

Top 10 Elements of Technology Entrepreneurship

Professor Tom Byers, Stanford University

- 1. What is technology entrepreneurship? What is the difference between an idea and a business opportunity?** Technology entrepreneurship is a style of business leadership based on the process of identifying high-potential, technology-intensive business opportunities, gathering resources such as talent and cash, and managing rapid growth using principled, real-time decision-making skills. An attractive business opportunity consists of a great value proposition, technically feasible products, strong intellectual property, a sustainable competitive advantage, a large potential market, and a proven business model. It can be based on either a revolutionary breakthrough in technology or an evolutionary advancement; and it can target an existing market or create an entirely new one. This entrepreneurial process is relevant for both independent startups and within established corporations. Disruptive technologies are particularly interesting as discussed in Christensen's *Innovator's Dilemma*. See *Technology Ventures* by Dorf and Byers as a textbook.

- 2. Why do ventures require dynamic leaders who understand vision, strategy, risk, and tactics?** Entrepreneurship is a process that involves identifying and reducing four major types of risks over time: people, technology, market, and financial. This is accomplished by the right combination of vision, strategy and execution. Although a compelling vision (e.g., core values and mission) and a set of strategies (e.g., product and market) are important, it is often execution that differentiates great companies from good ones. An A+ team and adaptable leadership can guide a venture through its challenging journey of growth and adversity where everyone works diligently on clear goals. *Built to Last* and *Good to Great* by Collins and Porras are excellent references as well as *Competing on the Edge: Strategy as Structured Chaos* by Eisenhardt.
- 3. How does context (e.g., economic and political climate) play a role in technology entrepreneurship?** All kinds of external forces impact entrepreneurship and reinforce the need to understand the entrepreneurial process. For instance, economic cycles can fluctuate dramatically, fostering periods of extreme optimism as well as those of deep concern and fear. And in some industries, political and government influences are the primary market drivers (e.g., biotechnology). A venture's location also plays a role, as attitudes toward entrepreneurship are different everywhere. Places like Silicon Valley, for example, offer infrastructure, networks, and talent in an environment that accepts failure in the pursuit of innovation. Friedman's *The World is Flat* and *The Silicon Valley Edge* by Stanford University Press are good references.
- 4. What is market positioning? Why are partnership strategies important?** Positioning forces a high-tech entrepreneur to clearly identify what the product or service is, who the customers are, what benefit it delivers, and how it differs from the competition. Successful positioning requires understanding the technology adoption life cycle made famous in *Crossing the Chasm* by Moore and the development and nurturing of true value-added partnerships. Great entrepreneurs use every asset (e.g., vision and intellectual property) to create mutually beneficial social networks.

- 5. What is the purpose of the business plan?** A business plan details a venture's compelling value for a growing market of customers and outlines its mission and purpose. It also introduces the venture's team, its technological solution, and its economic or business model. It is necessary for both external use (e.g., raising venture capital, gaining customers, and creating partnerships) and internal use (e.g., tracking against objectives and milestones). It provides a compass for negotiating the unforeseeable challenges ahead, rather than a definitive roadmap to success. A key reference is Sahlman's *How to Write a Great Business Plan* article in Harvard Business Review.
