Committee on Science,

Space, and Technology. Subcommittee on Technology, Environment, and Aviation, 1994 Distributed to some depository libraries in microfiche **Consumers in the Country** Ronald R. Kline, 2000-04-28 From 1900 to 1960 the introduction and development of four so called urbanizing technologies the telephone automobile radio and electric light and power transformed the rural United States But did these new technologies revolutionize rural life in the ways modernizers predicted And how exactly and with what levels of resistance and acceptance did this change take place In *Consumers in the Country* Ronald R Kline avoiding the trap of technological determinism explores the changing relationships among the Country Life professionals government agencies sales people and others who promoted these technologies and the farm families who largely succeeded in adapting them to rural culture Telecare Technologies and the Transformation of Healthcare N. Oudshoorn, 2011-10-27 Winner of the British Sociological Association Foundation for the Sociology of Health and Illness Book Prize 2012 This book traces the changes in healthcare implicated in telecare technologies information and communication technologies that enable care at a distance What happens when healthcare moves from physical to virtual encounters between healthcare professionals and patients What are the consequences for patients when they are expected to do things that used to be done by healthcare professionals What actually happens when homes become electronically wired to healthcare organizations These are urgent questions that are however largely absent in dominant discourses on telecare Drawing on insights from science technology and human geography this work opens up novel accounts of the adoption and use of new technologies in healthcare Nelly Oudshoorn shows how telecare technologies participate in redefining the responsibilities and identities of patients and healthcare professionals introducing a new category of healthcare workers and changing the kinds of care and spaces where healthcare is situated This book intervenes critically into discourses that celebrate the independence of place and time by showing how places and physical contacts still matter in care at a distance

American Farming Culture and the History of Technology Joshua T. Brinkman, 2024-05-06 Presenting a history of agriculture in the American Corn Belt this book argues that modernization occurred not only for economic reasons but also because of how farmers use technology as a part of their identity and culture Histories of agriculture often fail to give agency to farmers in bringing about change and ignore how people embed technology with social meaning This book however shows how farmers use technology to express their identities in unspoken ways and provides a framework for bridging the current rural urban divide by presenting a fresh perspective on rural cultural practices Focusing on German and Jeffersonian farmers in the 18th century and Corn Belt producers in the 1920s the Cold War and the recent period of globalization this book traces

how farmers formed their own versions of rural modernity Rural people use technology to contest urban modernity and debunk yokel stereotypes and women specifically employed technology to resist urban gender conceptions This book shows how this performance of rural identity through technological use impacts a variety of current policy issues and business interests surrounding contemporary agriculture from the controversy over genetically modified organisms and hog confinement facilities to the growth of wind energy and precision technologies Inspired by the author s own experience on his family s farm this book provides a novel and important approach to understanding how farmers culture has changed over time and why machinery is such a potent part of their identity This book will be of great interest to students and scholars of agricultural history technology and policy rural studies the history of science and technology and the history of farming culture in the USA *Low-skill Employment and the Changing Economy in Rural America* Robert Martin Gibbs,2005
