Technology And Strategy Conceptual Models And Diagnostics:

Technology and Strategy Richard A. Goodman, Michael W. Lawless, 1994-10-06 In today's complex dynamic competitive landscape management of technology can mean the difference between success and failure. Managers and researchers alike need effective ways to conceptualize and develop technology strategies. Richard Goodman and Michael Lawless provide tools needed to integrate firms' technology capabilities with their competitive direction. Technology and Strategy presents models that help put technology and its market impacts into perspective. It addresses the broad questions of how technology and markets evolve, how technology can re-order the rules of competition, and how it can shift the balance of individual firms' competitive advantage. It also blends topics currently capturing attention in business circles such as Total Quality Management and the resource-based view of the firm into a clear view of technology management programs. Technology and Strategy also describes methods to develop specific strategies to cope with challenges facing executives like evaluating promising but untried new technologies. Using actual case studies from the electronics and bio-tech industries, Goodman and Lawless demonstrate the use of new techniques to formulate strategy, including Technology Mapping and the Innovation Audit. Both were created to help executives choose the approach to technology best suited to their firms' particular capabilities. Offering clear practical guidance through a complex, fast-changing world of competition, this new analysis of technology and strategy is a valuable guide for general managers, R&D and manufacturing managers, strategic planners, and academics.

Strategic Decision Making in Modern Manufacturing Harinder Singh Jagdev, Attracta Brennan, J. Browne, 2013-06-29 Strategic Decision Making in Modern Manufacturing introduces and explains the AMBIT Advanced Manufacturing Business Implementation approach, which has been developed to bridge the gap between strategic management considerations and the operational effects of technology investment decisions on the manufacturing organisation, so that the likely impact of new manufacturing technology and/or programme implementations can be evaluated, anticipated, and accurately predicted. The AMBIT approach focuses specifically on the non-financial aspects of such investment decisions and offers an approach that allows a manager or more frequently a management team to understand the impacts of a new technology or a new programme on the manufacturing organisation in terms of manufacturing performance.

Managing Innovative Manufacturing Harry Boer, Anders Drejer, 2005 This e-book is based on papers presented at the conference on Managing Innovative Manufacturing, organised by the Center for Industrial Production. The conference took place on 22-23 September 2003 at Aalborg University, Denmark. Why a conference on managing innovative manufacturing? The main ones from a Western perspective are globalisation, hypercompetition, and an increasingly important role of what are currently low-cost countries.

The Routledge Companion to Design Research Paul A.
