## **Technology And Transition The Maghreb At The Crossroads:**

Technology and Transition Girma Zawdie, Abdelkader Djeflat, 1996 Selected articles from the proceedings of the first MAGHTECH International Conference on Strategies towards Science and Technology Based Development and Transition in the Maghreb Sfax Tunisia Dec 1994      *Technology and Transition* Abdelkader Djeflat, Girma Zawdie, 2014-01-14 The

Maghreb countries had a promising start in economic growth after independence For the most part they thrived on industrialisation by import substitution but unfortunately this strategy left them with macroeconomic and structural imbalances which together have effectively constrained their ability to compete in the world economic system and to catch up with the rapidly changing global techno economic circumstances Issues relating to aspects of technology transfer to the Maghreb strategies for technological and resource development and the integration of education and R D systems with the productive systems of the economies in the region are discussed along with relevant cases from Mexico China South Korea India and Bangladesh      **Building Science, Technology and Innovation Systems in Africa** Abdelkader

DJEFL, 2010-06-30 The book discusses the policies and strategies for Science and Technology S T and Innovation capability building put up by Maghreb states Algeria Tunisia Morocco in the last three decades The application of structural adjustment programmes SAPs in recent years the opening up of their economies and liberalisation of trade have confronted firms with largely innovation based competition and the attempt to reduce this impact are far from effective particularly in the face of the era of knowledge economy and sustainability requirements The work is articulated around three major themes the difficult path to S T capacity building the attempts to put up National Systems of Innovation NSI and the prospects for a more innovation driven growth at the territorial level notably through intermediate institutions and science and technology poles While pointing out the difficulties of building NSI the book examines how the context of an innovation driven competition put local firms especially SMEs in a difficult position It notes that universities which are prone to internal politics and rent seeking are not producing the necessary human capital The knowledge economy era challenges raise some hopes for better access to innovation and knowledge assets in the world while at the territorial level new innovation dynamics are taking place Based on extensive research and consultancy work done on the analysis of policies in the Maghreb the book also raises the issue of the neighborhood of the European Union and argues that unless Europe integrates the Maghreb in a real neighborhood Innovation System the prospects for innovation take off in the region are limited      **Index Islamicus**, 2007

**Science and Technology Policy in Africa** Jeggan Colley Senghor, 2000      *The Real Issues of the Middle East and the Arab Spring* Thomas Andersson, Abdelkader Djeflat, 2012-11-15 The wave of protests and populist uprisings in the Middle East has heightened the focus on a volatile region But the emphasis on political issues has obscured underlying issues concerning education infrastructure research innovation entrepreneurship and sustainable economic and social development This volume emerging in the aftermath of a conference and workshop on science and technology in the region presents

contributions from a range of experts from the Middle East Europe and the United States to provide fresh new insights and perspectives on the challenges and prospects for regional development in the changing global context of our time The authors explore such topics as the role of information and communication technologies mindset change in support of investment in intangible assets and risk taking how to approach cultural issues institutions and governance collaborations with other regions and benchmarking performance while drawing lessons of relevance for the special local context Ultimately they offer a number of precise policy recommendations and practical insights for creating an enabling environment for capturing economic political and social opportunity

*Construction Innovation and Process Improvement* Akintola Akintoye, Jack Goulding, Girma Zawdie, 2012-03-05 Innovation in construction is essential for growth The industry strives to remain competitive using a variety of approaches and needs to engage structured initiatives linked to proven innovation concepts techniques and applications Even in mature markets like the Architecture Engineering and Construction AEC sector where business behaviour is generally considered as being risk averse it is increasingly important to embed innovation into mainstream business practices In *Construction Innovation and Process Improvement* a number of wide ranging issues from construction practice in different countries with different contexts are presented to provide a rich collection of literature embracing theory and practice Chapters are divided into three broad themes of construction innovation relating to Theory and Practice Process Drivers and Future Technologies Several questions are posed including for example What is particularly unique about construction innovation in theory and practice What are the major drivers of construction innovation What factors are needed to support and deliver future construction technologies In attempting to respond to such questions the book sheds new light on these challenges and provides readers with a number of ways forward especially cognisant of the increased role of globalisation the enhanced impact of knowledge and importance of innovation All these can have a significant impact on strategic decision making competitive advantage and sustainable policies and practices Part One deals with change management technology sustainable construction and supply chain management Part Two addresses innovation and process improvement drivers including strategic management concurrent engineering risk management innovative procurement knowledge management Part Three explores future technologies in construction and particularly how these can be harnessed and leveraged to help procure innovation and process improvement

*Do We Still Need Peer Review?* Thomas H. P. Gould, 2012-11-20 The current peer review process is broken and unless changes are made it will soon die In *Do We Still Need Peer Review* author Thomas H P Gould examines the evolution of peer review from the earliest attempts by the Church to evaluate scholarly works to the creation of academic peer review and finally to the current status of the process Gould argues that without an immediate effort by scholars to institute reform the future of peer review may cease to exist As new technology provides authors with a direct unsupervised route to publication the peer review situation is nearing a tipping point beyond which the nature of academic research will be profoundly altered This book proposes that rather than

tossing out peer review altogether the process can be saved and made stronger offering suggestions on how to do just that

*Global Technology Transfer* John Chumack, 2002 Governments the world over fret continuously about the low level of transfer of technology especially within their own countries The general problem is military to industry although the variations are numerous Problems of presentation offering and support complicate an already byzantine world Yet somewhere within this dilemma lie the seeds of tomorrow s economic uptick Besides the nontrivial problems involved here the reluctance of the people having the technology to share it with someone who can profit from it stands out This book presents the issues and offers a comprehensive bibliography for easy access      *The Cumulative Book Index* ,1997 A world list of books in the English language
