Technology As Magic The Triumph Of The Irrational:

Technology as Magic Richard Stivers, 1999 At first glance technology and magic would seem to be opposites Technology is perceived to be rational scientific and efficacious whereas magic is thought to be irrational superstitious and ineffective Technology and magic while separate and distinct have taken on important characteristics of the other Publisher

Technology as Magic Richard Stivers, Stivers argues that our expectations of technology in society have led to the generation of a multitude of imitation technologies that function as magical practices once did *Through the Healing Glass* John Stanislaw Sadar, 2016-02-12 In the mid 1920s a physiologist a glass chemist and a zoo embarked on a project which promised to turn buildings into medical instruments The advanced chemistry of Vita Glass mobilised theories of light and medicine health practices and glassmaking technology to compress an entire epoch's hopes for a healthy life into a glass sheet yet it did so invisibly To communicate its advantage Pilkington Bros spared no expense as they launched the most costly and sophisticated marketing campaign in their history Engineering need for Vita Glass employed leading edge market research evocative photography and vanguard techniques of advertising psychology accompanied by the claim Let in the Health Rays of Daylight Permanently through Vita Glass Windows This is the story of how despite the best efforts of two glass companies the leading marketing firm of the day and the opinions of leading medical minds Vita Glass failed However it epitomised an age of lightness and airiness sleeping porches flat roofs and ribbon windows Moreover through its remarkable print advertising it strove to shape the ideal relationship between our buildings and our bodies **Youth Beyond the**

Developmental Lens Wesley W. Ellis, 2024 Wesley Ellis exposes the harmful impact of developmental psychology in youth ministry proposing a theological anthropology that frees us for deeper relationship with young people Propelled by the conviction that we must see youth as beings rather than becomings Ellis reorients us toward relational inclusion and away from rigid developmentalism *Medical Enhancement and Posthumanity* Bert Gordijn, Ruth Chadwick, 2008-10-20 As we are increasingly using new technologies to change ourselves beyond therapy and in accordance with our own desires understanding the challenges of human enhancement has become one of the most urgent topics of the current age This volume contributes to such an understanding by critically examining the pros and cons of our growing ability to shape human nature through technological advancements The authors undertake careful analyses of decisive questions that will confront society as enhancement interventions using bio info neuro and nanotechnologies become widespread in the years to come They provide the reader with the conceptual tools necessary to address such questions fruitfully What makes the book especially attractive is the combination of conceptual historical and ethical approaches rendering it highly original In addition the well balanced structure allows both favourable and critical views to be voiced Moreover the work has a crystal clear structure As a consequence the book is accessible to a broad academic audience The issues raised are of interest to a wide reflective public concerned about science and ethics as well as to students academics and professionals in areas such as

philosophy applied ethics bioethics medicine and health management

The Paradox of Citizenship in American Politics

Mehnaaz Momen, 2017-08-28 This remarkable book does the unusual it embeds its focus in a larger complex operational space The migrant the refugee the citizen all emerge from that larger context The focus is not the usual detailed examination of the subject herself but that larger world of wars grabs contestations and importantly the claimers and resisters Saskia Sassen Professor of Sociology Columbia University USA This thought provoking book begins by looking at the incredible complexities of American identity and ends with the threats to civil liberties with the vast expansion of state power through technology A must read for anyone interested in the future of the promise and realities of citizenship in the modern global landscape Kevin R Johnson Dean UC Davis School of Law USA Momen focuses on the basic paradox that has long marked national identity the divide between liberal egalitarian self conception and persistent practices of exclusion and subordination The result is a thought provoking text that is sure to be of interest to scholars and students of the American experience Aziz Rana Professor of Law Cornell Law School USA This book is an exploration of American citizenship emphasizing the paradoxes that are contained normalized and strengthened by the gaps existing between proposed policies and real life practices in multiple arenas of a citizen s life The book considers the evolution of citizenship through the journey of the American nation and its identity its complexities of racial exclusion its transformations in response to domestic demands and geopolitical challenges its changing values captured in immigration policies and practices and finally its dynamics in terms of the shift in state power vis vis citizens While it aspires to analyze the meaning of citizenship in America from the multiple perspectives of history politics and policy it pays special attention to the critical junctures where rhetoric and reality clash allowing for the production of certain paradoxes that define citizenship rights and shape political discourse

Shades of Loneliness

Richard Stivers, 2004-02-09 To varying degrees loneliness has us all in its grip In this incisive and controversial book Richard Stivers rejects the recent emphasis on genetic explanations of psychological problems arguing that the very organization of technological societies is behind the pervasive experience of loneliness The extreme rationality that governs our institutions and organizations results in abstract and impersonal relationships in much of daily life Moreover as common meaning is gradually eroded our connections to others become vague and tenuous Our ensuing fear and loneliness however can be masked by an outgoing extroverted personality In its extreme form loneliness assumes pathological dimensions in neurosis and schizophrenia Stivers maintains that even here the causes remain social The various forms of neuroses and psychoses follow the key contradictions of a technological society For instance narcissism and depression reflect the tension between power and meaninglessness that characterizes modern societies Stivers demonstrates that there is a continuum from the normal technological personality through the various neuroses to full blown schizophrenia He argues that all forms of loneliness emanate from the same cause they likewise share a common dynamic despite their differences Loneliness in its many manifestations seems to be the price we must pay for living in the modern world Yet

nurturing family friend and community ties can mitigate its culturally and psychologically disorganizing power This book is a clarion call for a renewal of moral awareness and custom to combat the fragmentation and depersonalization of our technological civilization *Gender and Early Television* Sarah Arnold,2021-05-20 Between the nineteenth century and the mid twentieth century television transformed from an idea to an institution In *Gender and Early Television* Sarah Arnold traces women s relationship to the new medium of television across this period in the UK and USA She argues that women played a crucial role in its development both as producers and as audiences long before the golden age of television in the 1950s Beginning with the emergence of media entertainment in the mid nineteenth century and culminating in the rise of the post war television industries Arnold claims that all along the way women had a stake in television As keen consumers of media women also helped promote television to the public by performing as television girls Women worked as directors producers technical crew and announcers It seemed that television was open to women However as Arnold shows the increasing professionalisation of television resulted in the segregation of roles Production became the sphere of men and consumption the sphere of women While this binary has largely informed women s role in television through her analysis Arnold argues that it has not always been the case ICTs and Sustainable Solutions for the Digital Divide: Theory and Perspectives Steyn, Jacques,Johanson, Graeme,2010-09-30 *ICTs and Sustainable Solutions for the Digital Divide Theory and Perspectives* focuses on Information and Communication Technologies for Development ICT4D which includes any technology used for communication and information This publication researches the social side of computing the users and the design of systems that meet the needs of ordinary users Handbook of Research on Knowledge-Intensive Organizations Jemielniak, Dariusz,Kociatkiewicz, Jerzy,2009-03-31 Provides an international collection of studies on knowledge intensive organizations with insight into organizational realities as varied as universities consulting agencies corporations and high tech start ups
