B. Morse and the Dawn of the Age of Electricity George F. Botjer,2015-05-06 The Morse telegraph launched the electronic telecommunications industry and reduced the travel time of information from days weeks and months to seconds and minutes It was one of the most important breakthrough inventions of all time George F Botjer s examination of the creator of the telegraph is based on previously unpublished archival sources It considers Samuel F B Morse the creator of the first telegraph and the ways in which place and time had an effect on the launch of his invention and his resulting fame and how the invention affected the inventor himself **The Dooleys of Richmond** Mary Lynn Bayliss,2017-05-15 The Dooleys of Richmond is the biography of two generations of a dynamic and philanthropic immigrant family in the urban South While most Irish Catholic immigrants who poured into the region in the nineteenth century were poor and illiterate John and Sarah Dooley were affluent and well educated They brought sophistication and capital to Virginia where John established one of the largest hat manufacturing companies in the United States Noted for their business acumen

and community service the Dooleys became leaders in business education culture and politics in Virginia A bellwether of the South during these tumultuous times the Dooleys fortunes would rise and fall and rise again Mary Lynn Bayliss recounts the family s history during their prosperous antebellum years John and his sons service in the Confederate army John s exploits as leader of the Richmond Ambulance Committee and the loss of the entire Dooley retail and manufacturing operations during the final days of the Civil War After the war the Dooleys son James a leading Richmond lawyer and philanthropist devoted half a century to developing railroad networks across the United States and became a key figure in the industrialization of the New South He and his wife Sallie built Maymont the famed Gilded Age estate that remains a major attraction in Richmond The story of the Dooleys is a fascinating window on southern society and the people who shaped its grand and turbulent history

Masterworks of Technology E. E. Lewis, 2010-05 In this absorbing exploration of technological creativity throughout the ages E E Lewis professor of mechanical engineering at Northwestern University eloquently tells the story of how science and engineering which had little in common until a few hundred years ago came together to create the technological world of the 21st century Today s technology is the product of a fascinating synergy of science s search for comprehension of the material universe and engineering s drive to build things and make them work In the 20th century this synergy achieved many unprecedented successes the most spectacular of which is arguably the first moon landing of the Apollo program Rocket science now symbolic of humanity s most complex technological endeavors is the culmination of centuries of achievements by architects of pyramids and cathedrals medieval craft guilds and pioneering inventors and scientists from the Renaissance through the Industrial Revolution Melding his own personal experiences from visiting Chartres Cathedral to flying aboard a Boeing 777 with vivid historical vignettes the author skillfully demonstrates the importance of craft tradition scientific method production organization economics and more to the creation of modern technology The many topics that Lewis illuminates include the slow evolution of the wheelwright s craft the background and training of the architect engineers who undertook the construction of medieval cathedrals the importance of patronage and venture capitalists in realizing the big ideas of past and present the increasing use of visualization as seen in Leonardo s notebooks Galileo s immense contribution of bringing science and engineering together the increasing importance of basic science as the seedbed of engineering and design innovations the challenge of attempting unprecedented feats while minimizing risk as exemplified by space flight and much more Whether Lewis is discussing the distribution of weight along flying buttresses the challenges faced by Morse in engineering the telegraph or the Apollo program s monumental team effort the author s deep knowledge of and enthusiasm for his subject and his gift for engaging lively prose make for a fascinating exploration of science and engineering through the ages E E Lewis Evanston IL the former chair of the Department of Mechanical Engineering is professor of mechanical engineering at the McCormick School of Engineering and Applied Science at Northwestern University He is the author of three engineering textbooks and numerous journal articles
