Telematics In Education The European Case:

Telematics in Education Wim Veen, 1994 *History of Computing in Education* J.A.N. Lee, John Impagliazzo, 2006-04-11

This work derives from a conference discussing the history of computing in education. This conference is the first of hopefully a series of conferences that will take place within the International Federation for Information Processing (IFIP) and hence we describe it as the First Conference on the History of Computing in Education (HCE1). These proceedings represent a collection of works presented at the HCE1 Conference held in association with the IFIP 2004 World Computer Congress held in Toulouse, France. Contributions to this volume range from a wide variety of educational perspectives and represent activities from four continents. The HCE1 conference represents a joint effort of the IFIP Working Group 9.7 on the History of Computing and the IFIP Technical Committee 3 on Education. The HCE1 Conference brings to light a broad spectrum of issues and spans four continents. It illustrates topics in computing education as they occurred in the early days of computing whose ramifications or overtones remain with us today. Indeed, many of the early challenges remain part of our educational tapestry; most likely, many will evolve into future challenges. Therefore, this work provides additional value to the reader as it will reflect in part the future development of computing in education to stimulate new ideas and models in educational development.

Telematics for Flexible and Distance Learning Barry Leonard, 1998-12. The DELTA catalogue presents a broad overview of the aims and activities of the Telematics for Flexible Distance Learning Programme (DELTA) as well as listing the specific deliverables and studies that are available to the public as a result of the work undertaken within the framework of the DELTA Programme. The catalogue aims to provide all the necessary information to enable readers to gain an understanding of the content range of subject areas covered by the work of the DELTA Programme.

Education and Training in Health Informatics in Europe A. Hasman, 1995. A European wide survey on the EDUCTRA (Education and Training in Health Informatics Concerted Action) was commenced in 1992 under the auspices of the AIM (Advanced Informatics in Medicine in Europe) programme. This book consists of four parts. The first chapter reproduces the original EC Recommendation and outlines the concerted European efforts in education and training in health telematics made by the European Commission DG XIII Health Telematics office. The second part provides the general guidelines for European curricula in health informatics as they were developed and elaborated by the members of the EDUCTRA Concerted Action 1992-1994. The third part of this volume entails the detailed descriptions and applications of curricula in health informatics in European states. The fourth part consists of a glossary of terms and acronyms used in current research and practice of health informatics. The work provides a comprehensive overview of the current needs in health informatics in Europe but also the necessary guidelines, materials, tools and applications for improving education and training within the near future. Readers: medicine and health care professionals, administrators, health professionals, teachers and trainers. The work provides not only a comprehensive overview of the current needs in health informatics in Europe but also the necessary guidelines, materials
