Billington, 2022-11-29 **Power Speed and Form** is the first accessible account of the engineering behind eight breakthrough innovations that transformed American life from 1876 to 1939 the telephone electric power oil refining the automobile the airplane radio the long span steel bridge and building with reinforced concrete Beginning with Thomas Edison s system to generate and distribute electric power the authors explain the Bell telephone the oil refining processes of William Burton and Eugene Houdry Henry Ford s Model T car and the response by General Motors the Wright brothers airplane radio innovations from Marconi to Armstrong Othmar Ammann s George Washington Bridge the reinforced concrete structures of John Eastwood and Anton Tedesko and in the 1930s the Chrysler Airflow car and the Douglas DC 3 airplane These innovations used simple numerical ideas which the Billingtons integrate with short narrative accounts of each breakthrough a unique and effective way to introduce engineering and how engineers think The book shows how the best engineering

exemplifies efficiency economy and where possible elegance With Power Speed and Form educators first year engineering students liberal arts students and general readers now have for the first time in one volume an accessible and readable history of engineering achievements that were vital to America s development and that are still the foundations of modern life Invented by Law Christopher Beauchamp,2015-01-05 Christopher Beauchamp debunks the myth of Alexander Graham Bell as the telephone s sole inventor exposing that story s origins in the arguments advanced by Bell s lawyers during fiercely contested battles for patent monopoly The courts anointed Bell father of the telephone likely the most consequential intellectual property right ever granted The People's Network Robert MacDougall,2014-01-08 The Bell System dominated telecommunications in the United States and Canada for most of the twentieth century but its monopoly was not inevitable In the decades around 1900 ordinary citizens farmers doctors small town entrepreneurs established tens of thousands of independent telephone systems stringing their own wires to bring this new technology to the people Managed by opportunists and idealists alike these small businesses were motivated not only by profit but also by the promise of open communication as a weapon against monopoly capital and for protection of regional autonomy As the Bell empire grew independents fought fiercely to retain control of their local networks and companies a struggle with an emerging corporate giant that has been almost entirely forgotten The People s Network reconstructs the story of the telephone s contentious beginnings exploring the interplay of political economy business strategy and social practice in the creation of modern North American telecommunications Drawing from government documents in the United States and Canada independent telephone journals and publications and the archives of regional Bell operating companies and their rivals Robert MacDougall locates the national debates over the meaning use and organization of the telephone industry as a turning point in the history of information networks The competing businesses represented dueling political philosophies regional versus national identity and local versus centralized power Although independent telephone companies did not win their fight with big business they fundamentally changed the way telecommunications were conceived American Inventors, Entrepreneurs, and Business Visionaries, Revised Edition Charles Carey Jr.,2020-03-01 Praise for the previous edition This fun to read source will add spice for economics and business classes American Reference Books Annual worthy of inclusion in reference collections of public academic and high school libraries Its content is wide ranging and its entries provide interesting reading Booklist A concise introduction to American inventors and entrepreneurs recommended for academic and public libraries Choice American Inventors Entrepreneurs and Business Visionaries Revised Edition profiles more than 300 important Americans from colonial times to the present Featuring such inventors and entrepreneurs as Thomas Edison and Madame C J Walker this revised resource provides in depth information on robber barons and their counterparts as well as visionaries such as Bill Gates Coverage includes Jeffrey Bezos Michael Bloomberg Sergey Brin and Larry Page Michael Dell Steve Jobs Est e Lauder T Boone Pickens Russell Simmons Oprah Winfrey Mark Zuckerberg

Gilded Age Entrepreneur Simon Cordery,2025-09-15 Simon Cordery's *Gilded Age Entrepreneur* illuminates the fascinating and chaotic business world of Albert Pullman. The influential but little known older brother of George Pullman and the craftsman of the family, Albert designed the first luxurious Pullman railroad cars and hosted promotional trips to show them off. In those heady early days he met national business and political leaders and hired the first Pullman porters. Albert and George made a formidable team but as the Pullman Company grew, Albert's role shrank. He turned to his own investment portfolio, often with disastrous results. Beginning with the industrial laundry that cleaned sleeping car linens, Albert appeared before the Supreme Court after a catastrophic insurance investment ran afoul of federal banking regulations and failed in an attempt to corner wheat futures. With evermore unsuccessful speculations, Albert was tempted by extralegal land sales and entered the silver mining game. Finally, his own family in crisis and his relationship with George shattered, Albert Pullman launched into one last round of adventurous investments with mixed results. *Gilded Age Entrepreneur* demonstrates that Albert Pullman embodied the small time investors who were legion after the Civil War. From banking and insurance to manufacturing and mining, a host of hopeful dreamers like Albert Pullman fueled the circulation of capital by forging political connections, creating and losing businesses, issuing shares, and longing for profit. **Modernist Invention** Edward

Allen,2020-07-23 *Modernist Invention* attends to the parallel histories of media technology and modernist American poetry. Patently Contestable Stathis Arapostathis, Graeme Gooday,2013-04-12 An examination of the fierce disputes that arose in Britain in the decades around 1900 concerning patents for electrical power and telecommunications. Late nineteenth century Britain saw an extraordinary surge in patent disputes over the new technologies of electrical power, lighting, telephony, and radio. These battles played out in the twin tribunals of the courtroom and the press. In *Patently Contestable*, Stathis Arapostathis and Graeme Gooday examine how Britain's patent laws and associated cultures changed from the 1870s to the 1920s. They consider how patent rights came to be so widely disputed and how the identification of apparently solo heroic inventors was the contingent outcome of patent litigation. Furthermore, they point out potential parallels between the British experience of allegedly patentee friendly legislation introduced in 1883 and a similar, potentially empowering shift in American patent policy in 2011. After explaining the trajectory of an invention from laboratory to Patent Office to the court, and the key role of patent agents, Arapostathis and Gooday offer four case studies of patent centered disputes in Britain. These include the mostly unsuccessful claims against the UK alliance of Alexander Graham Bell and Thomas Edison in telephony, publicly disputed patents for technologies for the generation and distribution of electric power, challenges to Marconi's patenting of wireless telegraphy as an appropriation of public knowledge, and the emergence of patent pools to control the market in incandescent light bulbs. *Analyzing Disputed Electrical Invention, digital original edition* Stathis Arapostathis, Graeme Gooday,2014-01-10 Late nineteenth century Britain saw an extraordinary surge in patent disputes over the new technologies of electrical power, lighting, telephony, and radio, which played out in the twin tribunals of the courtroom.

and the press In this BIT Stathis Arapostathis and Graeme Gooday examine the persistent conflicts over inventorship in electrical invention in this period analyzing disputes over who should be considered the first and true inventor of early electrical technologies
