The First Sacrifice:

The Story of Sacrifice Liane M. Feldman, 2020-09-21 The sacrificial instructions and purity laws in Leviticus have often been seen as later or secondary additions to an originally sparse Priestly narrative In this volume Liane M Feldman argues that the ritual and narrative elements of the Pentateuchal Priestly source are mutually dependent and that the internal logic and structure of the Priestly narrative makes sense only when they are read together Bringing together insights from the fields of ritual theory and narratology the author argues that the ritual materials in Leviticus should be understood and analyzed as literature At the core of her study is the assertion that these sacrificial instructions and purity laws form the backbone of the Priestly story world and that when these materials are read within their broader narrative context the Priestly narrative is first and foremost a story about the origins and purpose of sacrifice

How We Became Human Pierpaolo Antonello, Paul Gifford, 2015-10-01 From his groundbreaking *Violence and the Sacred* and *Things Hidden since the Foundation of the World* Ren Girard's mimetic theory is presented as elucidating the origins of culture He posits that archaic religion or the sacred particularly in its dynamics of sacrifice and ritual is a neglected and major key to unlocking the enigma of how we became human French philosopher of science Michel Serres states that Girard's theory provides a Darwinian theory of culture because it proposes a dynamic shows an evolution and gives a universal explanation This major claim has however remained underscrutinized by scholars working on Girard's theory and it is mostly overlooked within the natural and social sciences Joining disciplinary worlds this book aims to explore this ambitious claim invoking viewpoints as diverse as evolutionary culture theory cultural anthropology archaeology cognitive psychology ethology and philosophy The contributors provide major evidence in favor of

Girard's hypothesis Equally Girard's theory is presented as having the potential to become for the human and social sciences something akin to the integrating framework that present day biological science owes to Darwin something compatible with it and complementary to it in accounting for the still remarkably little understood phenomenon of human emergence **The**

Foundations of Roman Italy Joshua Whatmough, 2015-05-08 This book presents a picture of pre Roman Italy as complete and as faithful as modern discovery could make it when it was originally published in 1937 The evidence of archaeology is combined with the testimony of historical tradition and non Latin dialects in a balanced account of elements no less diverse than those of modern Europe This description of Italy in the middle of the last millennium B C illuminates the success of Rome in achieving a united Italy where others had failed an achievement which paved the way for the course over of events over centuries **The Myth of the Phoenix According to Classical and Early Christian Traditions** Roel B. van den

The Replaceability Paradigm Niall Martin, Ilios Willemars, 2024-06-04 The trope of humans being replaced by AI is one of the most familiar examples of the rhetoric of replaceability Not only have questions about what is unique and what is replaceable gained momentum in digital culture but notions of fungibility have emerged in many other contexts as well such as ecology management theory and more sinisterly in racist and conspiracist thinking This volume argues that there is a replaceability paradigm at work throughout the culture of modernity from the European Renaissance through Freudian psychoanalysis Chinese science fiction and postcolonial theory all the way to neural network programs such as Google's DeepDream This collection will be of interest to anybody engaged with the conceptual architecture of contemporary culture whether through film literature or new digital media **Classica Et Mediaevalia vol.47** Dansk Selskab for Oldtids- og
