Marianne Hirsch

The Family Album:

The Family Album Yeon-Soo Kim, 2005 This book is an examination of the use of the family album in contemporary Spanish culture Through the analysis of films narratives painting and a photographic exhibition produced from the end of Franco's dictatorship to the present Kim interrogates how the family album serves as a critical instrument to reflect on the treatment of the past in contemporary Spain the recuperation of repressed identities nostalgia for collective memory symptomatic of the cultural discontent with the erosion of a national boundary due to globalization and the increasing claim of diversity and ethical concerns for immigration This study explores a broad range of works by canonical as well as less studied writers and artists including Juan Goytisolo Carlos Saura and Marta Ballebo Coll Yeon Soo Kim is Assistant Professor of Spanish at Rutgers University

The Family Album Arthur De Moss, Nancy De Moss, 1969

Audiophotography David M. Frohlich, 2004-05-31 If you read the history of any new communication medium such as the cinema television or radio it always happens to be bound up with advances in some underlying technology For example cinema was born out of the rapid projection of a series of still images on a celluloid film strip The difficulty of synchronizing sound recordings with the resulting moving images led to about 30 years of silent films until such time as the technical problems were solved In between the inventions media seem to grow and develop at a slower pace as content producers and consumers experiment with the most satisfactory and stimulating ways of communicating with each other In the same example silent film makers eventually found ways of adding dialogue through scene titles and having music played during the projection of their films This book is about the next chapter in the history of photography which is emerging from a relatively stable period into a chaos of new inventions Photography as we know it is at the same point as the silent films of 1926 The transition from analog to digital photography is spawning many new ways of taking manipulating and sharing photographs It is also bringing photography and videography closer together by unifying sound still and moving images in the same digital medium
