Zoologist , 1868 **Jangar** , 2023-01-10 Jangar is the heroic epic of the Kalmyk nomads who are the Western Mongols of Genghis Khan's medieval empire in Europe Today Kalmykia is situated in the territory that was once the Golden Horde founded by the son of Genghis Khan Juchi Although their famed West Wing khanates and cities have long since disappeared under the sands of the Great Eurasian Steppe the Kalmyks have witnessed memorized and orally transmitted some of the most transformative developments both victorious and tragic in the history of civilizations A tribute to the protectors of the mythical country Bumba Jangar reflects the hopes and aspirations of the Kalmyk people their centuries long struggle for their cultural existence This book is an important step in the Kalmyk people's struggle for cultural survival following Soviet repression Making Jangar available in English is a landmark event bringing a lost classic to the world's attention and restoring the voices of an almost erased tradition at the heart of the history of Eurasia **Thing Knowledge** Davis Baird, 2004-02-10 Davis Baird's Thing Knowledge uses instruments to do philosophy Grappling with a wonderful assortment of objects from antique orreries to modern spectrographs he draws the reader deep into fascinating questions about the nature of knowledge All too often the knowledge Baird pursues here has been obscured by accounts that reduce understanding to theory By contrast in this rich text Baird shows the myriad of ways that models and devices do work in science by representing by manipulating by measuring and by calculating This is a book as lucid on the semantic account of theories as it is on the inner workings of the cyclotron it is a book that brings the laboratory to philosophers and philosophy into the laboratory Peter Galison author of Einstein's Clocks Poincaré's Maps Empires of Time Davis Baird has given us something new and demanding to think about namely in addition to propositional knowledge he argues there is thing knowledge That is scientific instruments embody or encapsulate knowledge in ways that most often not transparent In making his case Baird forces us to reconceptualize how we go about doing science and how to understand the product of human labor both intellectual and manual Thing Knowledge is must reading for anyone interested in the development of science and its attendant technologies Joseph C Pitt author of Thinking About Technology Foundations of the Philosophy of Technology Over the years the new frontier in philosophy of science has been on logic then on theories to most recently on models and experimentation Davis Baird goes one step further and considers the immediate kind of knowledge embodied by scientific instruments and devices His book is highly thought provoking and will become a classic source Eric Scerri UCLA Department of Chemistry and Biochemistry and editor of Foundations of Chemistry From the air pump to the dynamo to the cyclotron machines have played key roles in the development of scientific knowledge Here for the first time Davis Baird looks at those machines as actual forms of scientific knowledge Baird moves adeptly from historical case study to philosophical

Dingle,2012-12-06 This volume is an outgrowth of a Symposium entitled Evolution of Escape in Space and Time held at the XV International Congress of Entomology in Washington D C USA in August 1976 The choice of topic was prompted by recent advances in evolutionary ecology and the apparent suitability of insect migration and diapause as appropriate material for evolutionary studies In the event that choice seems amply justified as I hope a perusal of these papers will show These Symposium papers hardly cover the topic of the evolution of escape mechanisms exhaustively and I am sure everyone will have his favorite lacuna Some of the more obvious ones are indicated by Professor Southwood in his Concluding Remarks at the end of the book The purpose of the Symposium however was not complete coverage but rather to indicate the potential inherent in insect migration and diapause for the study of evolutionary problems In that I think we have succeeded reasonably well These papers are expanded and in some cases somewhat altered versions of the papers delivered in Washington This has allowed greater coverage of the topics in question I suggested a format of a general overview of a topic emphasizing the author's own research contributions In general the papers follow this outline although emphases vary Two of the authors Dr Rainey and Dr Lumme were unable to attend the Symposium Dr Rainey's paper was read by Mr Frank Walsh but Dr A Summer's Cruise in the Waters of Greece, Turkey, and Russia Alfred Colbeck,1887

The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and thrilling novel that will keep you wondering until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
