Tilstra,2014-04-04 While the 20th century brought many technological advancements to the battlefield a key weapon of warfare remains the soldier and his rifle This volume chronicles the historical development of the modern service rifle after World War II and examines its resurgence in Afghanistan after generations of absence following the introduction of the assault rifle Individual chapters survey the most combat tested models including the FN FAL U S M14 and HK 417 in technical detail emphasizing key points in the evolution of rifle technology and ammunition Also explored is the development of the current M16 series rifle and how recent difficulties in Afghanistan have led to an increasing reliance on the venerable M14 Providing a strong knowledge base of the various weapons now in service throughout the world this instructive work demonstrates that the battle rifle has not outlived its usefulness The Fighting Rifle Book 2 Mike Harland,2021-11-19 This manual covers basic to advanced level techniques for combative use of a semi automatic rifle While some fundamentals of marksmanship are included the emphasis is on practical applications ranging from civilian self defense through to two man teams and close protection operations The manual complements others by the same author that deal with pistol skills and personal security detail operations

The FN FAL Battle Rifle Bob Cashner,2013-08-20 Of all the infantry small arms developed during World War II one that generated the most interest was the German assault rifle the StG 44 Sturmgewehr This innovative weapon inspired the Soviet AK 47 in 7 62x39mm calibre In the West the NATO countries looked hard at new

weapons to upgrade their own infantry arsenals and counter the AK 47 resulting in the design of the Fusil Automatique Leroy Thompson or FAL. It proved to be a successful battle rifle and was soon adopted by the military and police forces of no fewer than 93 nations. The FAL dominated the militaries of the West to such a degree that its nickname became the Right Arm of the Free World. The FAL fulfilled every role it was asked to perform and remains a viable and well respected weapon to this day.

The G3 Battle Rifle Leroy Thompson, 2019-05-30. During the Cold War the G3 was one of the world's pre-eminent battle rifles. Developed in France and Spain after 1945, the rifle was produced by the German arms manufacturer Heckler & Koch. Adopted by more than 40 countries and produced on licence by many more, it was widely employed during colonial wars in Africa, insurgencies in Latin America and conflicts in the Middle East, but perhaps its widest use was in the Iran-Iraq War. Variants of the G3 have also seen substantial usage among Special Forces, including Britain's Special Boat Service and the US Navy SEALs. Semi-automatic versions, especially the HK91 and HK93, remain popular in the United States, and the G3-derived HK11 and HK21 family of light machine guns have also been widely adopted by military and law enforcement units across the world. Fully illustrated with specially commissioned artwork, this study examines one of the iconic weapons of the Cold War era.

The Battle of Moscow 1941-1942 Soviet General Staff, 2015-06-19. The Battle of Moscow 1941-1942: The Red Army's Defensive Operations and Counteroffensive Along the Moscow Strategic Direction is a detailed examination of one of the major turning points of World War II as seen from the Soviet side. The Battle of Moscow marked the climax of Hitler's Operation Barbarossa, which sought to destroy the Soviet Union in a single campaign and ensure German hegemony in Europe. The failure to do so condemned Germany to a prolonged war it could not win. This work originally appeared in 1943 under the title *Razгром Неметских Воиcк под Москвой*: The Rout of the German Forces Around Moscow. The work was produced by the Red Army General Staff's military historical section, which was charged with collecting and analyzing the war's experience and disseminating it to the army's higher echelons. This was a collective effort featuring many different contributors, with Marshal Boris Mikhailovich Shaposhnikov, former chief of the Red Army General Staff and then head of the General Staff Academy, serving as general editor. The book is divided into three parts, each dealing with a specific phase of the battle. The first traces the Western Front's defensive operations along the Moscow direction during Army Group Center's final push toward the capital in November-December 1941. The study pays particular attention to the Red Army's resistance to the Germans' attempts to outflank Moscow from the north. Equally important were the defensive operations to the south of Moscow, where the Germans sought to push forward their other encircling flank. The second part deals with the first phase of the Red Army's counteroffensive, which was aimed at pushing back the German pincers and removing the immediate threat to Moscow. Here the Soviets were able to throw the Germans back and flatten both salients, particularly in the south, where they were able to make deep inroads into the enemy front to the west and northwest. The final section examines the further development of the counteroffensive until the end of January 1942. This section highlights the Soviet advance all along the

front and their determined but unsuccessful attempts to cut off the Germans Rzhev Vyaz ma salient It is from this point that the front essentially stabilized after which events shifted to the south This new translation into English makes available to a wider readership this valuable study
