 The life of a major figure in twentieth century economic history whose impact has long been clouded by dubious allegations
 Although Harry Dexter White 1892 1948 was arguably the most important U S government economist of the twentieth century he is remembered more for having been accused of being a Soviet agent During the Second World War he became chief advisor on international financial policy to Secretary of the Treasury Henry Morgenthau a role that would take him to Bretton Woods where he would make a lasting impact on the architecture of postwar international finance However charges of espionage followed by his dramatic testimony before the House Un American Activities Committee and death from a heart attack a few days later obscured his importance in setting the terms for the modern global economy In this book James Boughton rehabilitates White delving into his life and work and returning him to a central role as the architect of the world s financial system Catalogue of Copyright Entries Library of Congress.
