R. Moyes, 1968 Air Pictorial, 1989 **A Bibliography of British History, 1914-1989** Keith Robbins, American Historical Association, Royal Historical Society (Great Britain), 1996 Containing over 25 000 entries this unique volume will be absolutely indispensable for all those with an interest in Britain in the twentieth century Accessibly arranged by theme with helpful introductions to each chapter a huge range of topics is covered There is a comprehensive index **The Development of British Naval Aviation, 1914-1918** Alexander Howlett, 2021-06-08 The Royal Naval Air Service RNAS revolutionized warfare at sea on land and in the air This little known naval aviation organization introduced and operationalized aircraft carrier strike aerial anti submarine warfare strategic bombing and the air defence of the British Isles more than 20 years before the outbreak of the Second World War Traditionally marginalized in a literature dominated by the Royal Flying Corps and the Royal Air Force the RNAS and its innovative practitioners nevertheless shaped the fundamentals of air power and contributed significantly to the Allied victory in the First World War The Development of British Naval Aviation utilizes archival documents and newly published research to resurrect the legacy of the RNAS and demonstrate its central role in Britain's war effort A History of the Mediterranean Air War, 1940-1945. Torpedo Bombers Peter C. Smith, 2008-03-27 This is a highly illustrated history one of the most deadly types of attack aircraft The torpedo bomber first appeared during the later years of World War One but served their most useful role in the Second World War The most famous attacks include Taranto where Fairey Swordfish destroyed the Italian Battle fleet and the infamous surprise attack on Pearl Harbor by the Japanese In both these cases the attacks were against ships laying in harbor and therefore stationary Heavy defensive anti aircraft fire was the greatest danger to the torpedo bombers in those circumstances but ships under way in the open sea had far more room to take evasive action The lengthy time it took a torpedo to reach its target allowed many ships to escape destruction However notable exceptions were the sinking HMS Prince of Wales and HMS Repulse by the Japanese during the early stages of the war in the Far East During the hunt for the Bismarck it was an air launched torpedo from a Swordfish that severely damaged the ships steering gear and enabled the Royal Navy to close in for the final kill Some of the types included are the Fairey Swordfish Bristol Beaufort Fairey Albacore Bristol Beaufighter Heinkel He 115 Marchetti SM 79 Fokker T VIII Grumman Avenger and the Nakajima B5N

delved into at a moment's notice Skua! Peter C. Smith, 2007-03-28 The Blackburn Skua was the first monoplane to be designed and built for the Royal Navy in the 1930s. As a result of continued debate it became a compromise between the Navy's desire for a carrier-based dive bomber and RAF's preference for a fighter. Despite being the first to shoot down a Luftwaffe aircraft in World War II, early operations in Norway found the type woefully inadequate as a fighter. As a dive bomber, the Royal Navy put the design to good use from the outset of WWII. It was involved with the hunt for the Graf Spee, sunk the major warship Koln, suffered with great loss in an attack on the Scharnhorst, helped to keep the German advance at bay during the Dunkirk evacuation, and attacked the French rogue battleship Richelieu in the Mediterranean. This book relates how the final design was created, how the dive bombing technique was developed and perfected by naval pilots, and traces the wartime operational career of the type with many first-hand accounts.

A History of the Royal Navy: World War I Mike Farquharson-Roberts, 2014-07-08 For many years the naval warfare of World War I has been largely overlooked, yet at the outbreak of that war the British Government had expected and intended its military contribution to the conflict to be largely naval. Britain was not simply defending an island; it was defending a far-flung empire. Without the navy, such an undertaking would have been impossible. Following the naval arms race in the early 20th century, both Britain and Germany were equipped with the latest naval technology, including revolutionary new vessels such as dreadnoughts and diesel-powered submarines. Although the Royal Navy's operations in World War I were global, most of the fleet's strength was concentrated in the Grand Fleet, which confronted the German High Seas Fleet across the North Sea. At the Battle of Jutland in 1916, the Royal Navy, under the command of Admiral Jellicoe, fought an iconic if inconclusive battle for control of shipping routes. 43,244 Royal Navy personnel lost their lives fighting on the seas in World War I. This book tells their story and places the navy back at the heart of the British war effort.
