will being psychologically independent achieving self knowledge or being morally conscientious then the best lives we can lead should be expected to involve substantial inauthenticity Feldman suggests that various construals of the ideal of authenticity presuppose metaphysically confused notions of the self for example that there is a determinate true self and that under the guise of indisputable wisdom the ideal perpetuates both objectionably relativistic as well as reactionary moral thinking Feldman concludes that the ideal of authenticity is one that we would be better off abandoning independent of our other moral or ethical commitments With implications for every reader s conception of authenticity and identity Against Authenticity is an exciting challenge for students and scholars of ethics metaethics metaphysics and moral psychology
