Young Women, Work, and Family in England 1918-1950 Selina Todd, 2005-09-22 This fascinating account of young women's lives challenges existing assumptions about working class life and womanhood in England between the end of the First World War and the beginning of the 1950s While contemporaries commonly portrayed young women as pleasure loving leisure consumers this book argues that the world of work was in fact central to their life experiences Social and economic history are woven together to examine the working family and social lives of the maids factory workers shop assistants and clerks who made up the majority of England's young women Selina Todd traces the complex interaction between class gender and locale that shaped young women's roles at work and home indicating that paid work structured people's lives more profoundly than many social histories suggest Rich autobiographical accounts show that while poverty continued to constrain life choices young women also made their own history Far from being apathetic workers or pliant consumers they forged new patterns of occupational and social mobility were important breadwinners in working class homes developed a distinct youth culture and acted as workplace militants In doing so they helped to shape twentieth century society

Change, Continuity and Class Neville Kirk, 1998 EU security governance assesses the effectiveness of the EU as a security actor The book has two distinct features Firstly it is the first systematic study of the different economic political and military instruments employed by the EU in the performance of four different security functions The book demonstrates that the EU has emerged as an important security actor not only in the non traditional areas of security but increasingly as an entity with force projection capabilities Secondly the book represents an

important step towards redressing conceptual gaps in the study of security governance particularly as it pertains to the European Union The book links the challenges of governing Europe s security to the changing nature of the state the evolutionary expansion of the security agenda and the growing obsolescence of the traditional forms and concepts of security cooperation Education and Economic Decline in Britain, 1870 to the 1990s Michael Sanderson,1999-04-22 Since the 1870s the British economy has steadily declined from its position as the workshop of the world to that of a low ranking European power Michael Sanderson examines the question of how far defects in education and training have contributed to this economic decline By looking at issues such as literacy the quality of scientific and technical training the supposed anti industrial bias of public schools and the older universities the neglect of vocational and technical training and the neglect of the non academic teenager Michael Sanderson demonstrates that education was far from the sole cause of economic decline but that its deficiencies have certainly played a part This book offers an accessible and concise analysis of a topic of current importance interest and debate and will be of interest to students and teachers of the history of education and its impact on British economic development in the twentieth century The Population History of Britain and Ireland 1500-1750 R. A. Houston,1995-09-28 This concise volume for students reviews the literature on the population history of Britain and Ireland

Education, Economic Change and Society in England 1780-1870 Michael Sanderson,1995-09-14 Moving from a specialist interest in recent years the study of the history of education has flourished and expanded Focusing on literacy this study reviews the history of education in the nineteenth century and the academic debates surrounding it Targeting Schools Alan Penn,2013-03-07 Militarism was inseparable from imperialism in Britain as in other imperialist nations and its proponents saw schools as ideal means by which to give the nation s youth an early introduction to military drill This book traces the history of military drill for pupils in elementary schools from 1870 1914 **Philanthropy and Voluntary Action in the First World War** Peter Grant,2014-02-18 This book challenges scholarship which presents charity and voluntary activity during World War I as marking a downturn from the high point of the late Victorian period Charitable donations rose to an all time peak and the scope and nature of charitable work shifted decisively Far more working class activists especially women became involved although there were significant differences between the suburban south and industrial north of England and Scotland The book also corrects the idea that charitably minded civilians efforts alienated the men at the front in contrast to the degree of negativity that surrounds much previous work on voluntary action in this period Far from there being an unbridgeable gap in understanding or empathy between soldiers and civilians the links were strong and charitable contributions were enormously important in maintaining troop morale This bond significantly contributed to the development and maintenance of social capital in Britain which in turn strongly supported the war effort This work draws on previously unused primary sources notably those regarding the developing role of the UK s Director General of Voluntary Organizations and the regulatory legislation of the period The Lancashire Working Classes c.1880-1930 Trevor Griffiths,2001-10-04

This book examines the experiences and values which shaped working class life in Britain in the half century from 1880. It takes as its focus a region Lancashire which was central to the social and political changes of the period. The discussion centres on two towns Bolton and Wigan which while they were geographically close differed significantly in their industrial fortunes and their electoral development. The formation of class identity is traced through developments in the world of work from the impact of technological and managerial innovations to the elaboration of collective bargaining procedures. Beyond work particular attention is paid to the dynamics of neighbourhood and family life the latter emerging as an important source of continuity in working class life. The broader impact of such influences are traced through a close examination of the electoral politics of the period. Dr Griffiths' conclusions fundamentally challenge the notion that the fifty years around the turn of the century witnessed the emergence of a working class more culturally and politically united than at any other time either before or since. Rather an alternative narrative of class development is offered in which broad continuities in working class life in particular the survival of religious ethnic and occupational points of division are emphasised. Despite the presence of strong and stable labour institutions from trade unions to Co-operative and Friendly Societies the picture emerges of a working class more individualist than collectivist in outlook more flexible in response to economic change and less constrained by the broader solidarities of work and neighbourhood than has previously been supposed.

An Age of Equipoise? Reassessing mid-Victorian Britain Martin Hewitt, 2017-07-05. The Age of Equipoise by W. L. Burn was published in 1964 and became a central text in the canon of interpretations of the Victorian period. The book subsequently fell out of favour but recent claims to establish a new interpretative standard have paradoxically prompted reviewers to cast back to Burn's work as the orthodox standard against which such claims should be judged. The essays in this volume by British and American contributors all engage to varying degrees with the notion of equipoise and how it can help to illuminate the mid-Victorian period in ways which alternative formulations cannot. Some of the chapters develop arguments embedded in Burn's own book others take up issues largely absent in The Age of Equipoise such as the position of children Britain's interaction with the wider world and the threats the period experienced to its concept of masculine identity. Together the essays demonstrate the intricacy and turbulence of the forces of cohesion in Victorian society along with the success of that culture in achieving a working if shifting modus vivendi. Moreover they substantiate the argument that whatever the limitations of Burn's work equipoise deserves rehabilitation as a powerful conceptual framework for making sense of mid-Victorian Britain. About the Editor Martin Hewitt is Director of the Leeds Centre for Victorian Studies and editor of the Journal of Victorian Culture. With Robert Poole he has recently produced an edition of The Diaries of Samuel Bamford 1858-61 Sutton 2000.
