Ngwainmbi,2014-05-08 Healthcare Management Strategy Communication and Development Challenges and Solutions in Developing Countries analyzes the ways in which health services public health administration and healthcare policies are managed in developing countries and how intercultural intergroup and mass communication practices are weakening those efforts If developing countries are to reach their development goals their leaders must have a firm understanding of the impact of infectious diseases on their people and take prompt action to fix socioeconomic issues arising from the problems associated with poor health practices Drawing on experiences from international health organizations such as the United Nations Population Fund UNFPA commissioned in poor countries to assist national governments in improving the wellbeing of their citizens this volume analyzes maternal and child mortality and the spread of infectious diseases and offers communication strategies for the management of malaria HIV Aids Polio tuberculosis and others in Somalia Madagascar Ghana South Africa Zimbabwe Nigeria the Democratic Republic of Congo and India

Protecting and Promoting Good Nutrition in Crisis and Recovery Food and Agriculture Organization of the United Nations,2005 Every year natural disasters armed conflicts and other forms of crisis adversely affect the lives of millions of people in the developing world In many countries families are forced to abandon their homes farms and villages access to adequate food becomes difficult and hardship contributes to high rates of malnutrition This book offers guidance to program planners and technicians in the fields of nutrition food security agriculture and community development in adopting a longer term perspective to addressing problems of household food insecurity and malnutrition during periods of crisis and recovery It provides a framework for an implementation strategy that focuses on both saving lives in the short term and strengthening livelihood to ensure that households are less vulnerable to food and nutrition insecurity in the future

EU Law and Obesity Prevention Amandine Garde,2010-10-11 Since the 1980s there has been an alarming increase in the prevalence of obesity in virtually every country in the world As obesity is known to lead to both chronic and severe medical problems it imposes a cost not only on affected individuals and their families but also on society as a whole In Europe the Obesity Prevention White Paper of May 2007 followed by the adoption of an EU School Fruit Scheme the acknowledgement that food advertising to children should be limited and proposed legislation to make nutrition labeling compulsory has firmly placed obesity on the EU agenda by laying

down a multi sectoral strategy and a basis for future action In accordance with this growing sense of urgency this is the first book to offer an in depth legal analysis of obesity prevention with particular reference to Europe It describes what the EU has done and could do to support Member States in fighting the obesity epidemic and clearly shows the way to locating advocacy strategies within the framework of EU law The thorough analysis includes a discussion of the following issues the need to address nutrition and physical activity as important health determinants the emphasis traditionally placed at EU level on food safety rather than food quality the need for the development of databases on nutrition and physical activity comparable common indicators and risk assessment mechanisms mainstreaming public health into all EU policies the scope of EU powers in the case law of the Court of Justice the role of information in the EU s obesity prevention strategy the Commission s proposed Mandatory Nutrition Declaration the Food Claims Regulation the regulation of food marketing to children and in particular the role of the Audiovisual Media Services Directive the Unfair Commercial Practices Directive and industry self regulation food reformulation the use of economic instruments in the EU s obesity prevention strategy with an emphasis on the Common Agricultural Policy and the EU s taxation policy and EU action in the fields of sport occupational health and safety and transport policy The author convincingly shows that conflicts of interest inherent in market forces demand a strong EU intervention preferably through legislation than self regulation She also demonstrates the urgent need to reach an agreement on the basis of reliable data about what is effective in practice to improve lifestyles The study acknowledges that the law is not a panacea but nonetheless has an influential role to play in making the healthy choice an easier choice and must move decisively towards ensuring that the societal costs associated with obesity are sustainable and that the ultimate goal of a healthy population is achievable The book is essential reading for everyone involved or interested in the development of the EU s obesity prevention policy **Technical Report Series** World Health Organization,1998

Preparation and Use of Food-based Dietary Guidelines Joint FAO/WHO Consultation on the Preparation and Use of Food-Based Dietary Guideline, World Health Organization, 1998 This report provides an expert practical guide to the formulation and implementation of national dietary guidelines based on recommended foods and food groups rather than nutrients Addressed to policy makers and the nutritionists who advise them the report aims to facilitate the use of food based dietary guidelines as a sensible new way to help consumers make healthy food choices Throughout the report recommendations whether concerning the importance of food variety or the percent of dietary protein that should be of animal origin draw on the latest biochemical and physiological knowledge about human nutritional requirements in health and disease Health problems related to both dietary insufficiency and excess are considered in this comprehensive report The book opens with an explanation of the many reasons why dietary recommendations based on foods are more effective as an instrument of public health nutrition than are guidelines based on nutrients Readers are also reminded of the need to formulate dietary guidelines in response to specific diet related health problems important in a country and to ensure that recommendations are based on sound scientific evidence Against this background the first main section establishes the scientific rationale for the

development of food based dietary guidelines drawing on current knowledge in four main areas nutrition science food science and technology educational behavioural and social sciences and agricultural and environmental sciences The section also compares different methods for assessing the nutritional quality of diets and explains each of the steps to follow when reorienting dietary recommendations from nutrients to foods Methods of monitoring food and nutrient intake are presented and compared in the next section which includes advice on how data from a range of sources can be used when setting dietary goals and formulating recommendations Section three provides detailed step by step guidance on how to develop food based dietary guidelines and ensure that populations understand them and follow their advice The remaining sections explain how to transform guidelines into message and slogans and monitor their effectiveness in improving dietary practices In a key achievement the second part of the report provides an expert state of the art review of scientific knowledge from animal clinical and epidemiological studies about the relationship between diet nutrition and health Throughout this review a special effort is made to identify areas where scientific data support firm dietary recommendations based on individual foods food groups and food combinations Information ranges from advice on the use of nutrient densities in the development and evaluation of dietary guidelines through data on the role of vitamins as chemopreventive agents to a discussion of non nutrient components found in fruit that may explain their capacity to prevent cardiovascular diseases and gastrointestinal cancers The report concludes with examples of the ways in which foods and food groups have been incorporated into dietary guidelines in selected countries
