Tourism Research Methods Brent W. Ritchie, Peter Burns, Catherine Palmer, 2005 Within the tourism industry there is a growing consensus on the need for research to investigate the economic social and environmental impacts of tourism However

existing research methods texts are based solely on either the business approach or the social science approach to tourism. They often fail to provide real world examples of how to plan, implement or analyse tourism related research. This book aims to address this divide by integrating theory with practice through the inclusion of specific tourism research case studies alongside research theory. It considers a wide range of research issues, approaches and techniques with contributions from both experienced and new researchers. *Research Methods for International Human Rights Law* Damian

Gonzalez-Salzberg, Loveday Hodson, 2019-06-13. The study and teaching of international human rights law is dominated by the doctrinal method. A wealth of alternative approaches exists but they tend to be discussed in isolation from one another. This collection focuses on cross theoretical discussion that brings together an array of different analytical methods and theoretical lenses that can be used for conducting research within the field. As such it provides a coherent, accessible and diverse account of key theories and methods. A distinctive feature of this collection is that it adopts a grounded approach to international human rights law through demonstrating the application of specific research methods to individual case studies. By applying the approach under discussion to a concrete case it is possible to better appreciate the multiple understandings of international human rights law that are missed when the field is only comprehended through the doctrinal method. Furthermore, since every contribution follows the same uniform structure, this allows for fruitful comparison between different approaches to the study of our discipline. **Political Affairs** Earl Browder, 2002. A theoretical and political

magazine of scientific socialism. Anthropology Tim Ingold, 2018-04-27. Humanity is at a crossroads. We face mounting inequality, escalating political violence, warring fundamentalisms and an environmental crisis of planetary proportions. How can we fashion a world that has room for everyone for generations to come? What are the possibilities in such a world of collective human life? These are urgent questions and no discipline is better placed to address them than anthropology. It does so by bringing to bear the wisdom and experience of people everywhere, whatever their backgrounds and walks of life. In this passionately argued book, Tim Ingold relates how a field of study once committed to ideals of progress collapsed amidst the ruins of war and colonialism, only to be reborn as a discipline of hope destined to take centre stage in debating the most pressing intellectual, ethical and political issues of our time. He shows why anthropology matters to us all. *Introducing Polity's Why It Matters* series. In these short and lively books, world leading thinkers make the case for the importance of their subjects and aim to inspire a new generation of students.
