Technique, Discourse, and Consciousness David Lovekin, 2022-05-19 This study examines the French thinker Jacques Ellul 1912 1994 and his historical biblical and social analyses of how technology manipulates and impoverishes modern thought culture and language In the spirit of Georg Hegel and Ernst Cassirer Ellul explores how technology begins in myths stories and religion advances to tools and then develops into data algorithms and abstract systems which are detached from human bodies and communities Efficiency then becomes an absolute in all areas of human life and the mentality of technique becomes lost in its creations These modern symbols posing as ultimate human goods and values are denigrated by technique leaving humanity awash in clichés in groundless social media and in blathering slogans that sustain the illusion that politics and culture have now become *Structure, Consciousness, and History* Richard Harvey Brown, Stanford M.
