Water Technology in the Middle Ages Roberta J. Magnusson, 2003-04-01 Focusing attention on gravity fed water flow systems in medieval cities and monasteries *Water Technology in the Middle Ages Cities Monasteries and Waterworks* after the Roman Empire challenges the view that hydraulic engineering died with the Romans and remained moribund until the Renaissance Roberta Magnusson explores the systems technologies how they worked what uses the water served and also the social rifts that created struggles over access to this basic necessity Mindful of theoretical questions about what hastens technological change and how society and technology mutually influence one another the author supplies a thoughtful and instructive study Archeological historical and literary evidence vividly depicts those who designed constructed and used medieval water systems and demonstrates a shift from a public administrative to a private innovative framework one that argues for the importance of local initiatives The following chapters attempt to chart a course between the Scylla and Charybdis of technological and social determinism While writing them I have tried to strike a balance between the technical and human aspects of medieval hydraulic systems and to remember that beneath the welter of documents and diffusion patterns configurations and components ordinances and expenditures lie the perceptions the choices and often the plain hard work of individual men and women from the Preface *The Medieval Military Engineer* Peter Fraser Purton, 2018 Sheds light on the skills and techniques of the medieval military engineer over a thousand year sweep The results of medieval engineering still surround us cathedrals castles stone bridges irrigation systems However the siege artillery siege towers temporary bridges earthwork emplacements and underground mines used for war have left little trace behind them and there is even less of the engineers themselves the people behind the military engineering achievements The evidence for this neglected group is studied here The author begins by considering the evolution of military technology across centuries and

the impact of new technologies in the context of the economic and social developments which made them possible He looks at how military engineers obtained their skills and the possible link with scholastic scientific awareness With the increased survival of government records from the middle ages engineers acquire names and individuals can be identified And the fifteenth century the age of polymaths such as Leonardo da Vinci saw a new type of literate military engineer part of a recognized profession but with its roots in a thousand years of historical development PETER PURTON D Phil Oxon FSA has written extensively on medieval fortifications and siege warfare his publications include the comprehensive two volume history of the medieval siege Boydell 2010 Infirmity in Antiquity and the Middle Ages Christian Krötzl, Katariina Mustakallio, Jenni Kuuliala, 2016-03-09 This volume discusses infirmitas infirmity or weakness in ancient and medieval societies It concentrates on the cultural social and domestic aspects of physical and mental illness impairment and health and also examines frailty as a more abstract cultural construct It seeks to widen our understanding of how physical and mental well being and weakness were understood and constructed in the longue durée from antiquity to the Middle Ages The chapters are written by experts from a variety of disciplines including archaeology art history and philology and pay particular attention to the differences of experience due to gender age and social status The book opens with chapters on the more theoretical aspects of pre modern infirmity and disability moving on to discuss different types of mental and cultural infirmities including those with positive connotations such as medieval stigmata The last section of the book discusses infirmity in everyday life from the perspective of healing medicine and care *Guide to the History of Technology in Europe* 1996 Sarah Angliss, 1996 **Sacred Heritage** Roberta Gilchrist, 2020-01-02 Forges innovative connections between monastic archaeology and heritage studies revealing new perspectives on sacred heritage identity medieval healing magic and memory This title is available as Open Access **The Discovery of the Baltic** Nils Blomkvist, 2004-11-01 Nils Blomkvist discusses how the Baltic Rim was initially Europeanized between 1075 and 1225 AD He compares the indigenous civilisations to the prevailing western European one After the expansive Viking period European penetration became a process of discovery The importance of the Catholic Reform movement and its unintentional ties to the formation of an enduring commodity market are outlined Clashes and compromises are investigated in case studies of the Kalmarsund region Gotland and the Daugava valley Dissimilar cases of state formation are compared those of Sweden and Livonia Many classical scholarly problems are revisited A new approach to the period's narrative sources brings to life Scandinavian German Russian Finno Ugrian and Baltic attitudes and day to day concern in the midst of a change of epic dimensions Images of Thomas Becket in the Middle Ages and Beyond Alyce A. Jordan, Kay Brainerd Slocum, 2025-03-25 Explores the commemoration and memorialisation of the Canterbury martyr in visual and material culture In life and especially in death Thomas Becket was nothing short of a medieval celebrity whose significance spanned the European high Middle Ages in to the sixteenth century Henry VIII's suppression of his cult in 1536 only served to enhance his popularity elsewhere Visual

depictions of his life high profile careers spectacular demise and posthumous legacies are numerous These images document both the extent and the efficacy of his invocation across religious political and civic agendas Becket remains the stuff of literature and legend art drama and cultural commodification This volume explores Becket imagery both in such traditional media as stained glass and illuminated manuscripts and less common objects toys baptismal fonts and vernacular almanacs Its essays provide new interpretations of the archaeological iconographic and historiographic spectrum of Becket imagery by for example deconstructing religious secular binaries in the study of pilgrim badges and revising long established interpretations of Canterbury stained glass They also expand the Becket visual canon into broader geographic and temporal contexts from medieval Denmark and Spain to eighteenth and nineteenth century Britain and twenty first century Boston Meanwhile contributions which look at the appropriation and use of Becket imagery in the aftermath of the English Reformation break new ground in scrutinizing a subject well traversed in text but that has only begun to be explored in visual and material culture
