Technology As Freedom The New Deal And The Electrical Modernization Of The American Home:

Technology as Freedom Ronald C. Tobey, 2022-07-15 Before 1930 the domestic market for electrical appliances was segmented but New Deal policies and programs created a true mass market reshaping the electrical and housing markets and guiding them toward mandated social goals The New Deal identified electrical refrigeration as a key technology to reform domestic labor raise family health and build family assets New Deal incentives led to nearly fifty percent of Title I National Housing Act loans being used to buy electric refrigerators in the 1930s New Deal policies ultimately created the mass commodity culture of home owning families that typified the conservative 1950s This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1996 Powering American Farms Richard F. Hirsh, 2022-06-14 The untold story of the power industry's efforts to electrify growing numbers of farms in the years before the creation of Depression era government programs Even after decades of retelling the story of rural electrification in the United States remains dramatic and affecting As textbooks and popular histories inform us farmers obtained electric service only because a compassionate federal government established the Tennessee Valley Authority and the Rural Electrification Administration REA during the Great Depression of the 1930s The agencies success in raising the standard of living for millions of Americans contrasted with the failure of the greedy big city utility companies which showed little interest in the apparently unprofitable nonurban market Traditional accounts often describe the nation's population as split in two separated by access to a magical form of energy just past cities limits a bleak preindustrial class of citizens endured literally in near darkness at night and envious of their urban cousins who enjoyed electrically operated lights refrigerators radios and labor saving appliances In Powering American Farms Richard F Hirsh challenges the notion that electric utilities neglected rural customers in the years before government intervention Drawing on previously unexamined resources Hirsh demonstrates that power firms quadrupled the number of farms obtaining electricity in the years between 1923 and 1933 for example Though not all corporate managers thought much of the farm business a cadre of rural electrification advocates established the knowledge base and social infrastructure upon which New Deal organizations later capitalized The book also suggests that the conventional storyline of rural electrification remains popular because it contains a colorful hero President Franklin D Roosevelt and villainous utility magnates such as Samuel Insull who make for an engaging but distorted narrative Hirsh describes the evolution of power company managers thinking in the 1920s and early 1930s from believing that rural electrification made no economic sense to realizing that serving farmers could mitigate industry wide problems This transformation occurred as agricultural engineers in land grant universities supported by utilities demonstrated productive electrical technologies that yielded healthy profits to farmers and companies alike Gaining

confidence in the value of rural electrification private firms strung wires to more farms than did the REA until 1950 a fact conveniently omitted in conventional accounts Powering American Farms will interest academic and lay readers of New Deal history the history of technology and revisionist historiography Ties That Bind Charles Jacobson,2017-03-13 In the early days of utility development municipalities sought to shape the new systems in a variety of ways even as private firms struggled to retain control and fend off competition In scope and consequence some of the battles dwarfed the contemporary one between local jurisdictions and cable companies over broadband access to the Internet In this comparative historical study Jacobson draws upon economic theory to shed light on relationships between technology market forces and problems of governance that have arisen in connection with different utility networks over the past two hundred years He focuses on water electric and cable television utility networks and on experiences in four major American cities Boston Seattle San Francisco and Pittsburgh arguing that information and transactions costs have played decisive roles in determining how different ownership and regulatory arrangements have functioned in different situations Using primary sources and bold conceptualizations Jacobson begins his study by examining the creation of centralized water systems in the first half of the nineteenth century moves to the building of electric utilities from the 1880s to the 1980s and concludes with an analysis of cable television franchising from the 1960s to the 1980s Ties That Bind addresses highly practical questions of how to make ownership regulatory and contracting arrangements work better and also explores broader concerns about private monopoly and the role of government in society **Building Suburbia** Dolores Hayden,2004-11-09 A lively and provocative history of the contested landscapes where the majority of Americans now live From rustic cottages reached by steamboat to big box stores at the exit ramps of eight lane highways Dolores Hayden defines seven eras of suburban development since 1820 An urban historian and architect she portrays housewives and politicians as well as designers and builders making the decisions that have generated America s diverse suburbs Residents have sought home nature and community in suburbia Developers have cherished different dreams seeking profit from economies of scale and increased suburban densities while lobbying local and federal government to reduce the risk of real estate speculation Encompassing environmental controversies as well as the complexities of race gender and class Hayden s fascinating account will forever alter how we think about the communities we build and inhabit **What's Good for Business** Kim Phillips-Fein,Julian E. Zelizer,2012-04-12 This book provides a sweeping interpretation of how business mobilized to influence public policy and elections since World War II Visual Merchandising Louisa Iarocci,2017-07-05 Situated at the crossroads of visual culture and consumerism this essay collection examines visual merchandising as both a business and an art It seeks to challenge that scholarly ambivalence that often celebrates the spectacle but denies the agenda of consumerism The volume considers strategies in the imaging of selling from the mid nineteenth century to the present in terms of the visual interaction that occurs between the commodity and the consumer and between body and space Under the categories of Promotion Product and Place contributors to the

volume examine the strategies in the presentation of retail goods and environments that range from print advertising to product design to store display and architecture Visual Merchandising The Image of Selling is located directly at the nexus of business practice and cultural myth where the spectator never loses sight of their status as buyer and the object of desire is always still a commodity

Detached America James A. Jacobs, 2015-09-09 During the quarter century between 1945 and 1970 Americans crafted a new manner of living that shaped and reshaped how residential builders designed and marketed millions of detached single family suburban houses The modest two and three bedroom houses built immediately following the war gave way to larger and more sophisticated houses shaped by casual living which stressed a family's easy sociability and material comfort and were a major element in the cohesion of a greatly expanded middle class These dwellings became the basic building blocks of explosive suburban growth during the postwar period luring families to the metropolitan periphery from both crowded urban centers and the rural hinterlands Detached America is the first book with a national scope to explore the design and marketing of postwar houses James A Jacobs shows how these houses physically document national trends in domestic space and record a remarkably uniform spatial evolution that can be traced throughout the country Favorable government policies along with such widely available print media as trade journals home design magazines and newspapers permitted builders to establish a strong national presence and to make a more standardized product available to prospective buyers everywhere This vast and long lived collaboration between government and business fueled by millions of homeowners established the financial mechanisms consumer framework domestic ideologies and architectural precedents that permanently altered the geographic and demographic landscape of the nation

Fixing Niagara Falls Daniel Macfarlane, 2020-09-01 Since the late nineteenth century Niagara Falls has been heavily engineered to generate energy behind a flowing facade designed to appeal to tourists Fixing Niagara Falls reveals the technological feats and cross border politics that facilitated the transformation of one of the most important natural sites in North America Daniel Macfarlane details how engineers bureaucrats and politicians conspired to manipulate the world's most famous waterfall Essentially they turned this natural wonder into a tap huge tunnels divert the waters of the Niagara River around the Falls which ebb and flow according to the tourism calendar To hide the visual impact of diverting the majority of the water the United States and Canada cooperated to install massive control works while reshaping and shrinking the Horseshoe Falls This book offers a unique interdisciplinary perspective on how the Niagara landscape ultimately embodies both the power of technology and the power of nature

From Catharine Beecher to Martha Stewart Sarah A. Leavitt, 2003-04-03 Today's domestic advice writers women such as Martha Stewart Cheryl Mendelson and B Smith are part of a long tradition notes Sarah Leavitt Their success rests on a legacy of literature that has focused on the home as an expression of ideals Here Leavitt crafts a fascinating genealogy of domestic advice based on her readings of hundreds of manuals spanning 150 years of history Over the years domestic advisors have educated women about everything from

modernism and morality to sanitation and design Their writings helped create the idealized vision of home held by so many Americans Leavitt says Investigating cultural themes in domestic advice written since the mid nineteenth century she demonstrates that these works which found meaning in kitchen counters parlor rugs and bric a brac have held the interest of readers despite vast changes in women s roles and opportunities Domestic advice manuals have always been the stuff of fantasy argues Leavitt demonstrating cultural ideals rather than cultural realities But these rich sources reveal how women understood the connection between their homes and the larger world At its most fundamental level the true domestic fantasy was that women held the power to reform their society through first reforming their homes
