Multinationals from the Second World Carl H. McMillan,1987-06-18 **Khrushchev in the Kremlin** Jeremy

Smith,Melanie Ilic,2011-01-25 This book presents a new picture of the politics economics and process of government in the Soviet Union under the leadership of Nikita Khrushchev Based in large part on original research in recently declassified archive collections the book examines the full complexity of government including formal and informal political relationships economic reforms and nationality relations in the national republics of the USSR the treatment of political dissent economic progress through technological innovation relations with the Eastern bloc corruption and deceit in the economy and the reform of the railways and construction sectors The book re evaluates the Khrushchev era as one which represented a significant departure from the Stalin years introducing a number of policy changes that only came to fruition later whilst still suffering from many of the limitations imposed by the Stalinist system Unlike many other studies which consider the subject from the perspective of the Cold War and superpower relations this book provides an overview of the internal development of the Soviet Union in this period locating it in the broader context of Soviet history This is the companion volume to the Jeremy Smith and Melanie Ilic s previous edited collection Soviet State and Society under Nikita Khrushchev Routledge 2009

Development of Computer Technology in COMECON Countries B. Silhan,FOREIGN TECHNOLOGY DIV

WRIGHT-PATTERSON AFB OHIO.,1975 In recent years the development of computer technology in the COMECON countries has accelerated This development is demonstrated in the application of computers in classical areas of their application but also in the use of computers in new areas New information and control systems of increasing complexity are now in use and the use of these systems are discussed **East Germany, a Country Study** Eugene K. Keefe,1982 **Technology Export**

From The Socialist Countries Jan Monkiewicz,Jan Maciejewicz,2019-07-11 Only since the 1970s have the East European Socialist countries known collectively as Comecon participated in the international exchange of technology as exporters In this book Drs Monkiewicz and Maciejewicz analyze the technology export performance of the Comecon countries They begin by defining the nature of technology as a commodity analyzing the structural characteristics of the international market and outlining both the cost and benefits of technology export Later chapters provide an overview of Comecon technological policies in the 1970s with particular attention to the export import factor and Comecon regional technological cooperation In depth analysis is presented through case studies of the experiences of Poland and Czechoslovakia The book concludes with a discussion of the implications of technology export by socialist countries particularly its potential impact on existing global patterns of technological dependence and domination **Diffusion of New Technologies in the Post-Communist World**

Y.M. Rabkin,2013-03-11 The end of this century has witnessed dramatic changes in morality history and geography These changes were felt throughout the world and also across the entire gamut of professional concerns Even relatively remote and

seemingly insulated activities such as science and technology have experienced and up to a point contributed to these dramatic changes This volume presents a series of views on the effect of these changes on science and technology and more specifically on the international diffusion of new technologies These views come from a variety of fields among them history and sociology of science political science information sciences marketing Yet most authors share an interest in science policy studies which permeates this collection It would be fair to say that this volume belongs to the intellectual domain known as STS i e studies in Science Technology and Society The authors come from nine countries and their contributions are expected to reflect this diversity It is well known that the dominant lingua franca in the end of the 20th century is Broken English with the possible exception of a minority of native English speakers some of whom fail to learn this new language An attempt was therefore made throughout this volume to conform to a certain standard of English usage and at the same time to preserve the local flavour of expression and the stylistic and cultural dimensions of each chapter

Technological Innovation, Globalization and the Cold War Wolfgang Mueller, Peter Svik, 2022-11-24 This volume focuses on the interconnections between the Cold War technological innovation and globalization Although the consequences of globalization have received ample attention in both academia and the public discourse only limited attention has so far been given to the factors that instigated various waves of this process This holds particularly true for the period following World War II during which a struggle between the two global blocs fanned not only technological innovations but also their transfer This volume is dedicated to examining the links between the Cold War and this phase in the history of globalization a phase that gradually made the world despite high levels of international tension more and more inter related More specifically it anchors a very contemporary phenomenon to its historical context and pinpoints how the varied and multi layered East West interactions helped to induce and foster the globalization processes Emphasizing technology and its cross bloc flows as well as several levels of actors including states private companies and individuals this volume reflects an important shift towards transnationalism which has occurred in the historiography in the recent years This book will be of interest to students of Cold War Studies science and technology studies and International Relations
