Future Forms and Design For Sustainable Cities Mike Jenks, Nicola Dempsey, 2006-08-11 Concentrating on the planning and design of cities the three sections take a logical route through the discussion from the broad considerations at regional and city scale to the larger city at high and lower densities through to design considerations on the smaller block scale Key design issues such as access to facilities access for sunlight life cycle analyses and the impact of communications on urban design are tackled and in conclusion the research is compared to large scale design examples that have been proposed and or implemented over the past decade to give a vision for the future that might be achievable *The Elements of Architecture* Scott Drake, 2014-02-04 The Elements of Architecture is a clear and well structured introduction to sustainable architecture which concentrates on general principles to make an accessible and comprehensive primer for undergraduate students The author takes a fresh and logical approach focusing on the way aspects of the built environment are experienced by the occupants and how that experience is interpreted in architectural design He works through basic elements and senses sun heat light sound air water and fire to explain and frame effective environmental architectural design not only arguing that the buildings we inhabit should be viewed as extensions of our bodies that interact with and protect us from these elements but also using this analogy to explain complex ideas in an accessible manner *The Ecological Engineer* David R. Macaulay, Jason F. McLennan, 2006 THE ECOLOGICAL ENGINEER is a new book series that celebrates the most innovative engineers in North America and the practices and principles that they use to produce functionally outstanding structures systems and technologies in a way that embraces the emerging philosophy of sustainable design Organized into three critical sections Practice Principles and Projects the book provides a valuable resource and touchstone for engineers architects and other design professionals who hope to embrace an ethic that is responsible to both people and the environment VOLUME ONE KEEN ENGINEERING focuses on the innovative work of one of the leading sustainable MEP firms in North America KEEN Engineering As mechanical electrical and plumbing engineers who work on projects all over the continent they have consistently been inspiring on multiple levels as a company as individuals and just by the sheer volume and quantity of their work Provided by publisher **Material Architecture** John Fernandez, 2012-08-21 Composed of a series of essays this book deals with the broad issues affecting the nature of architectural materials and provides a focused review of the state of the art materials It also provides designers with the tools they need to evaluate and select from the thousands of different materials that are available to them The book is organized into three sections Time looks at how the materials used in architectural design have changed over the years showing how we have come to use the materials we do in contemporary design Materials covers all five material families metals polymers ceramics composites and natural materials giving in depth information on their properties behavior origins and uses in design It also introduces a review of the cutting edge research for each family Systems outlines the technical design orientated research that uncovers how new architectural assemblies can be designed and engineered All of this practical advice is given along with many real case

examples illustrating how this knowledge and information has been and can be used in architectural design **Sustainable Building Design** Vidar Lerum, 2015-09-07 A twenty first century renaissance is emerging in architecture After a century of building designs characterized by high energy demand low quality lighting and poor thermal comfort the fundamental questions must be asked again is there a better path to designing the most energy efficient comfortable functional and beautiful buildings for a sustainable future While seeking solutions for the future are there lessons to be learned from the best buildings of the past Sustainable Building Design explores outstanding buildings and building designs of the twenty first century with an emphasis on the artistry of masters of architecture who came before By dissecting and analyzing great public buildings of the nineteenth and twenty first centuries materials techniques and methods are discovered This book presents the reader with clues and suggestions that will reveal the secrets of these buildings and by doing so provides the reader with a thorough understanding of how these architectural masterpieces work Using photographs drawings sections plans and diagrams which are painstakingly redrawn for consistency and clarity based on a wide range of documentation Vidar Lerum compares works of architecture from the nineteenth and twenty first centuries The reader is presented with a careful analysis of each building providing a compelling sourcebook of ideas for students and professional architects alike

Architecture and Ideology Mirjana Roter Blagojević, Marta Vukotic Lazar, Vladimir Mako, 2014-06-02 Architecture and Ideology consists of twenty two essays arranged in four thematic units Ideological Context of Architecture City and Power Morphology and Ideological Patterns and Designers and Ideology The subjects that are investigated and elaborated are connected with the influences of different 20th century political and social ideologies on urban development and the architecture of various European cities from the east and the west The authors are professors and scientific researchers from various European universities and institutions and theoreticians of architecture architectural historians and aestheticians and architecture practitioners The majority are from Serbia and other countries from the former Yugoslav Republic namely Croatia Macedonia and Bosnia and Herzegovina though countries such as Hungary Russia Italy Austria Germany Netherlands and the UK are also represented The essays will be of interest to university professors and students researchers in the history and theory of architecture and city and professionals in art and architecture as well as sociologists historians and philosophers

Materials for a Healthy, Ecological and Sustainable Built Environment Emina K. Petrović, Brenda Vale, Maibritt Pedersen Zari, 2017-03-23 Principles for Evaluating Building Materials in Sustainable Construction Healthy and Sustainable Materials for the Built Environment provides a comprehensive overview of the issues associated with the selection of materials for sustainable construction proposing a holistic and integrated approach The book evaluates the issues involved in choosing materials from an ecosystem services perspective from the design stage to the impact of materials on the health of building users The three main sections of the book discuss building materials in relation to ecosystem services the implications of materials choice at the design stage and the impact of materials on building users and

their health The final section focuses on specific case studies that illustrate the richness of solutions that existed before the rise of contemporary construction and that are consistent with a sustainable approach to creating built environments These are followed by modern examples which apply some if not all of the principles discussed in the first three sections of the book Provides a holistic and integrated approach to the issues associated with the selection of materials for sustainable construction Provides a thorough understanding of ecosystem services based on ecology research for built environment design Provides an original review of the impact of materials on human health Provides case studies to illustrate the points above
