Telecommunication In Asia Policy Planning Development:

Telecommunications in Asia John Ure, 1995-01-01 This book provides searching analysis and a detailed and comprehensive account of telecommunications in the developing economies of Southeast and East Asia

Telecommunications Development in Asia John URE, 2008-05-01 No industry has expanded faster than telecommunications gained so many new users added so much value spread so rapidly to the underdeveloped areas of developing countries done so much to close the digital divide and provide access to e learning e health and e commerce across the countries of the Asia Pacific Telecommunications Development in Asia provides a completely new and comprehensive analysis of the policies adopted throughout the region that have led to the explosive growth of this sector It is a sequel to the 1995 landmark publication John Ure editor Telecommunications in Asia Policy Planning and Development and like the earlier volume will become a popular and indispensable guide for professionals policy makers and regulators working in telecommunications related sectors Part One of this new book is thematic It reviews global best practices across a range of key issues facing the industry from regulation competition policy and the provision of universal service to interconnection between competing networks the management of radio spectrum for the all important wireless communications sector and an assessment of innovation in the telecommunications equipment market Part Two examines markets across the Asia Pacific region exploring the themes of Part One through in depth country studies Policy and regulations industry trends and markets are uniquely placed in their historical economic and political context No other publication offers such comprehensive insights and understanding of the dynamic of these markets And like the 1995 book this one looks likely to stand the test of time

Business, Markets and Government in the Asia-Pacific Yun-Peng Chu, Rong-I Wu, 2002-09-11 Exploring the thorny issues of industrial organisation competition policy and liberalization in the Asia Pacific region this book examines the ways in which governments regulate business Using case studies from China the USA New Zealand Thailand Malaysia and Japan the authors take a comparative look at the evolution of policies and their implementation on the ground With a specific focus on the energy transport and telecommunications sectors this book represents the most up to date analysis of the ways in which governments in the Asia Pacific are coping with rapid industrial and economic change **China and the Knowledge**

Economy Carl J. Dahlman, Jean-Eric Aubert, 2001 Annotation Argues that in order to address the growing economic social and political pressures of the 21st Century China will have to build solid foundations for a knowledge based economy by updating the economic and institutional regime upgrading education and learning and building information infrastructure

Policy Research Working Paper International Bank for Reconstruction and Development, 1991 Organising Labour in Globalising Asia Andrew Brown, Jane Hutchison, 2003-09-02 This book offers wide ranging insights into the organising capacities of workers in Asia today Nine case studies examine workers responses to class relations through independent unions non government organisations NGOs and more dis organised struggles Countering the notion that globalisation holds

entirely negative consequences for labour organisation the authors reveal some of the openings for local activism which can arise from transnational production arrangements The volume covers the second tier industrializers China Thailand Malaysia the Philippines Indonesia India and Bangladesh Interdisciplinary in nature it will be of great interest to students and scholars of Asian studies development studies and international labour studies *The Silicon Empire* Michael B. Likosky, 2018-01-18 Michael Likosky examines the continuities and discontinuities between colonial and present day high tech transnational legal orders His concern is specifically with the colonial characteristics of the legal order which underpins the global high tech economy He distinguishes the democratic and human rights rhetoric of this economy from a reality wherein the legal order is often used to reproduce colonial type relationships Just as in the colonial period the expansion of trans border commerce overlaps with democratic demands and human rights in complex multifaceted and paradoxical ways Through a case study looking at Malaysia's Multimedia Super Corridor a high tech national development plan and foreign direct investment scheme he examines how the transnational leaders of the high tech economy along with the Malaysian political elite react when human rights problems threaten to derail commercial plans *Information Technology and the Challenge for Hong Kong* Janice M. Burn, Maris G. Martinsons, 1997-09-01 The twenty first century is frequently cited as the Asia Pacific Century due to the phenomenal success of Asian countries over the last three decades Nowhere has this been more visible than in Hong Kong which became the first Newly Industrialized Economy to enter the world's top ten trading communities in 1991 This book describes the current state of information technology IT exploitation in Hong Kong and the role of IT in the rapid advancement of the Asia Pacific region It raises issues such as the impact of politics culture and societal growth on IT effectiveness but does not try to provide all the answers and is therefore of interest to both business and IT managers in global organizations or companies operating in cross cultural settings It is also invaluable for students of business management and IT who will play a strategic role in the future development of the new global economy *Global Networks, Linked Cities* Saskia Sassen, 2016-04-15 In her pioneering book *The Global City* Saskia Sassen argued that certain cities in the postindustrial world have become central nodes in the new service economy strategic sites for the acceleration of capital and information flows as well as spaces of increasing socio economic polarization One effect has been that such cities have gained in importance and power relative to nation states In this new collection of essays Sassen and a distinguished group of contributors expand on the author's earlier work in a number of important ways focusing on two key issues First they look at how information flows have bound global cities together in networks creating a global city web whose constituent cities become global through the networks they participate in Second they investigate emerging global cities in the developing world Sao Paulo Shanghai Hong Kong Mexico City Beirut the Dubai Iran corridor and Buenos Aires They show how these globalizing zones are not only replicating many features of the top tier of global cities but are also generating new socio economic patterns as well These new patterns of development promise to lead to significant changes in the structure of the

global economy as more and more cities worldwide are integrated into globalization's circuitry. Includes contributions from Linda Garcia Patrice Riemens Geert Lovink Peter Taylor David Smith Michael Timberlake Stephen Graham Sueli Schiffer Ramos Christoff Parnreiter Felicity Gu David Meyer Pablo Ciccolella Iliana Mignaqui Eric Huybrechts Ali Parsa. Also includes six maps. Unfinished Business Gary Clyde Hufbauer, Erika Wada, 1997. In February 1997 69 countries accounting for 95 percent of world telecommunications traffic agreed to open their basic telecommunications service markets. In April 1997 28 countries accounting for 80 percent of world trade in information technology IT goods agreed to eliminate tariffs on IT goods by January 2000. These two agreements represent significant steps toward global telecommunication liberalization. The agreements also mark the beginning of new battles that will determine the extent of competition and reform in the telecommunications industry in the 21st century. Although implementation of the two pacts will be phased in over several years some signatory countries are already facing a backlash from local telecommunications companies and equipment suppliers. Hence the issue remains highly contentious around the world. In this volume leading scholars from different countries offer their assessments of the two new agreements. They also predict the evolution of the telecommunications industry in the years ahead. The volume provides essential background on future developments in this dynamic and crucial sector and suggests ways in which it can be shaped to provide maximum benefits for the world economy.
