Bukoski, 2007-08-06 There are a number of reasons why this book is important First there is no one source that summarizes what we know about the prevention of substance abuse from the research field so the book serves as a repository of accumulated knowledge on prevention theory intervention design and development and prevention research methodology Second as an evolving field prevention science has only begun to assert itself in both the arenas of practice and policy The formation of the Society for Prevention Research in 1991 was the first recognition that a science of prevention existed and required a separate forum to present the rapidly growing content of the field for discussion and review Finally there is a need to establish a baseline a reference point against which progress in the field of prevention science can be assessed This book serves all of these purposes The idea for this book grew from the observation in the early 1990s that after decades of attempts to develop effective interventions to prevent drug use among children and adolescents in the United States that we were finally having success particularly in addressing the initiation of use These successes are the result of research that has provided a better understanding of the factors and processes associated with the onset of substance use **A Guide to Internal Loss Prevention** Roy L. Wanat, 2016-01-22 A Guide to Internal Loss Prevention provides an analysis of loss prevention factors from the inside looking out rather than the outside looking in bringing to management's attention specific organizational areas that may be contributing to internal loss It is the authors intent to demonstrate that management personnel often do not pay attention to

essential details and that this laxity carelessness or deliberate negligence is costing both industry and the consuming public billions of dollars annually in needless added costs This book is organized by recognizable business functions rather than by type of organization Key topics discussed include the administrative financial management production area personnel and safety considerations of loss prevention White collar crime computer security and information security are also covered Where possible case studies are supplied to clearly depict an actual loss situation so that management sees how it can happen An attempt is made to identify loss producing situations their possible causes their effects and finally recommendations for remedies that may enable management to prevent recurrences thereby saving money and ultimately profits
