Telescope Making For Beginners:

Telescope Making for Beginners Roy Worvill,1974 **Amateur Telescope Making** Stephen Tonkin,2012-12-06

Many amateur astronomers make their own instruments either because of financial considerations or because they are just interested Amateur Telescope Making offers a variety of designs for telescopes mounts and drives which are suitable for the home constructor The designs range from simple to advanced but all are within the range of a moderately well equipped home workshop The book not only tells the reader what he can construct but also what it is sensible to construct given what time is available commercially Thus each chapter begins with reasons for undertaking the project then looks at theoretical consideration before finishing with practical instructions and advice An indication is given as to the skills required for the various projects Appendices list reputable sources of mail order materials and components The telescopes and mounts range from shoestring very cheap instruments to specialist devices that are unavailable commercially **Amateur Telescope**

Making in the Internet Age Robert L. Clark,2010-10-14 Building an astronomical telescope offers the amateur astronomer an exciting challenge with the possibility of ending up with a far bigger and better telescope than could have been afforded otherwise In the past the starting point has always been the grinding and polishing of at least the primary mirror a difficult and immensely time consuming process But now that the Internet has brought us together in a global village purchasing off the shelf goods such as parabolic mirrors eyepieces lenses and telescope tubes is possible There are also a vast number of used mirrors and lenses out there and it is now possible to track them down almost anywhere in the world Online stores and auction houses have facilitated commerce regarding all sorts of useful optical components at a reasonable price This is a book about making telescopes from available parts It provides guidance on where to look and what to look for in selecting items useful for telescope making and explains how to assemble these components to produce an excellent instrument on a tight budget At one time many amateurs made their own telescopes from home made parts In today s rushed world that has almost become a lost art The Internet offers a wonderful alternative to either buying a pricey scope fully assembled or making your own from scratch *Beginner's Guide to Astronomical Telescope Making* James Muirden,1975-01-01 Explains every stage and procedure of constructing a simple reflecting telescope from grinding the mirror to mounting the finished instrument and discusses simple refracting and larger reflecting models *NightWatch* Terence Dickinson,1998 A practical guide to viewing the universe **Standard Handbook for Telescope Making** Neale E. Howard,1984 Describes different types of telescopes explains how to set up a workshop and build an observatory and discusses recent developments in celestial photography **The Journal of the Royal Astronomical Society of Canada ...** Royal Astronomical Society of Canada,1935 Library catalogue in 1911 31 p appended to v 4 **Astronomy: The Universe, Solar System & Earth (A Beginner's Guide to Telescopes, Eyepieces and Accessories for Visual Astronomy)** Kelvin Hernandez,101-01-01 This eBook provides a highly visual introduction to some basic astronomy concepts that everyone should know like explaining the
