

Sets

A television set, "telly", is a device that combines a tuner, display, an amplifier, and speakers for the purpose of viewing television and hearing its audio components.

Introduced in the late 1920s in mechanical form, television sets became a popular consumer product after World War II in electronic form, using cathode ray tubes.

The addition of color to broadcast television after 1953 further increased the popularity of television sets and an outdoor antenna became a common feature of suburban homes.

The television set became the display device for recorded media in the 1970s, such as Betamax and VHS, which enabled viewers to record TV shows and watch prerecorded movies.

In the subsequent decades, TVs were used to watch DVDs and Blu-ray Discs of movies and other content.

Major TV manufacturers announced the discontinuation of CRT, DLP, plasma and fluorescent-backlit LCDs by the mid-2010s.

Televisions since 2010s mostly use LEDs. LEDs are expected to be gradually replaced by OLEDs in the near future.
