

The Family Factor

Gary W. Peterson, Kevin R. Bush

The Family Factor:

Psychopathology and the Family Jennifer Hudson, Ron Rapee, 2005-10-11 Understanding the factors that place an individual at greater risk of developing psychopathology has important implications for both treatment and prevention of psychological disorders. Of critical relevance in this regard is the exploration of the potential influence of the family. Parenting and the family environment are considered to significantly contribute to a child's early development and adjustment. It follows then that parental behavior may also be of importance in the development, maintenance, and/or the prevention of psychopathology. Over the past 50 years there has been a considerable amount of research as well as controversy surrounding the link between parenting and psychopathology. The purpose of this book is to provide researchers and clinicians with state-of-the-art research findings presented by experts in the field on the role of the family in the development and maintenance of psychopathology. This edited book is divided into 3 sections. The first addresses broader issues of theory and methodology and the second provides separate chapters relating to the role of the family in the development and maintenance of specific psychopathologies. A final section discusses the involvement of the family in treatment and prevention.

Handbook of Marriage and the Family Gary W. Peterson, Kevin R. Bush, 2012-09-14 The third edition of *Handbook of Marriage and the Family* describes, analyzes, synthesizes, and critiques the current research and theory about family relationships, family structural variations, and the role of families in society. This updated *Handbook* provides the most comprehensive state-of-the-art assessment of the existing knowledge of family life with particular attention to variations due to gender, socioeconomic, race, ethnic, cultural, and life style diversity. The *Handbook* also aims to provide the best synthesis of our existing scholarship on families that will be a primary source for scholars and professionals but also serve as the primary graduate text for graduate courses on family relationships and the roles of families in society. In addition, the involvement of chapter authors from a variety of fields including family psychology, family sociology, child development, family studies, public health, and family therapy gives the *Handbook* a multidisciplinary and interdisciplinary framework.

Chronic Disorders and the Family Froma Walsh, Carol M. Anderson, 2014-06-03 Here are the most recent developments in clinical research and theory on the role of the family in understanding and treating chronic mental and physical illnesses. Internationally respected scholars and psychotherapists present comprehensive and authoritative information vital to professionals who work with families coping with severe disorders. *Chronic Disorders and the Family* explores how clinicians can become more aware of the common experiences of patients and their families struggling with chronic psychiatric and medical disorders, thus promoting a better understanding of the contribution of family dynamics. With its focus on the interactional nature of psychopathology, this important book encourages psychotherapists to compare and contrast the various treatment perspectives and approaches available. Specific disorders discussed include schizophrenia, clinical depression, borderline disorders, anxiety disorders, particularly agoraphobia, eating disorders, substance abuse, and chronic medical illnesses.

Boys in Fatherless Families Elizabeth Herzog,Cecelia E. Sudia,1971 **Family Life in Adolescence** Patricia

Noller,Sharon Atkin,2014-01-01 Many parents fear the time when their beautiful happy children will become unmanageable adolescents continually engaging in risky or destructive behaviour Unfortunately this view of adolescents is the focus of the media even though it relates to just a small proportion of young people As the large amount of research we report shows most adolescents are responsible young people who care about their families and crave the support of their parents It is also true however as much research indicates that the quality of the relationship parents have with their adolescents is crucial to the wellbeing of those young people We discuss the need for parents to set reasonable limits on their adolescents and to expect appropriate behavior We also show on the basis of research that children who have experienced positive caring relationships with their parents are more likely than other adolescents to behave responsibly In other words behavior in adolescence does not come out of nowhere but builds on earlier experiences in the family Because of the large amount of research reported in this volume we expect that it will be useful to practitioners from a range of professions that are likely to focus on adolescents social workers youth leaders welfare workers religious leaders psychologists and psychiatrists and contribute to a better understanding of young people and their development and the importance of families to that development The Family in the New Millennium Thomas B.
