The Fear Factor The Core Of A Desperate Society:

The Fear Factor Barry S. Philipp,1998 **The Fear Factor** Barry Philipp,2008-05 Revealing a neurophysiological connection between fear and many social and emotional problems this resource unlocks the true sources and reasons for violence hate racism substance abuse intolerance and other societal ills The Cumulative Book Index ,1999 Cumulated Index to the Books ,1999 **Books In Print 2004-2005** Ed Bowker Staff,Staff Bowker, Ed,2004 *Successful Management in the Digital Age* John Harte,2017-07-05 Successful Management in the Digital Age examines key factors for success in today s business environment finding markets being vigilant for new trends and changes exploiting opportunities and overcoming obstacles While acknowledging the benefits of technological advances in some areas John Harte shows how artificial intelligence is limited and often imperfect Becoming thoughtlessly dependent on it may replace the far more rewarding benefits of human ingenuity creativity and innovation For Harte organizational complacency is one of the prime causes of business inertia It often results from past successes that create an illusion of wisdom and invulnerability which blinds leaders to warning signs De industrialization is just one example of a movement that led to the present market stagnation Harte reminds executives and entrepreneurs of the basic formula for success in any business producing a product or service that people want and providing it at the right time for the right price in order to make a suitable profit He warns us to resist temptations of the digital era such as automation that results in over production and market saturation outsourcing that risks losing customers and losing control of brands and markets by needless offshoring *Forthcoming Books* Rose Arny,1998-04 *Social and Economic Management in the Competitive Society* Edgar Krau,2012-12-06 In many countries of the world there is a growing feeling of uneasiness about the economic situation and its related social consequences Every day the newspapers tell us that the recession is over but we see only that scores of organizations go bankrupt while others are struggling hard to stay in business that many people have lost their jobs but welfare measures are being reduced or abolished altogether By now we should have become aware that our society is not facing temporary market difficulties but a much deeper and wider crisis with only one root in worldwide economic developments while other roots are social and psychological in nature These factors are intertwined and therefore the answer to the crisis cannot merely be an economic cost benefit analysis of organizational management Sociocultural factors participate in the economic process even at the level of individual organizations and what happens in them has backlash influences on the entire society Therefore the problem is not the management of the individual organization but the macroconception of management which in the Western world of today separates the economic aspects from the social ones and the individual organizations from society Social and Economic Management in the Competitive Society begins by analyzing the management models of today to determine which characteristics yield the best results on the economic and social levels The second step is to indicate the necessary changes of managerial thinking and acting in order to boost economic results with reasonable profits while minimizing social costs

Finally the potential ramifications of such changes are explored Rural Society and the Anglican Clergy, 1815-1914 Robert Lee, 2006 A vivid and accessible reappraisal of the frequently uneasy relationship between the Victorian clergyman and his congregation The conduct of divine service was only one item on the agenda of the nineteenth century clergyman He might have to sit on the magistrates bench or concern himself with business as a farmer or landowner or attend a meeting of the Poor Law guardians He would in all probability be closely involved with the day to day running of the local school and he would almost certainly be the principle administrator of the parochial charities While some of these roles were clearly predestined to bring him into conflict with certain members of his flock others seem ostensibly designed to operate in their interests None however seem to have earned him much in the way of devotion and respect instead each of them at one time or another attracted the direct hostility of parishioners most particularly those attached to dissenting and or radical groups This book is a detailed exploration of the relationship between Anglican clergymen and the inhabitants of rural parishes in the nineteenth century Taking Norfolk as a focus the author examines the many and profound ways in which the Victorian Church affected the daily lives and political destinies of local communities New Statesman Society , 1990-05
