The Essence and the Margin Laura Rorato, Anna Saunders, 2009 With the expansion of the EU and calls for a European constitution the question of a common European identity has become increasingly pressing in recent times However in the face of diverse national and regional traditions and the absence of an obvious European cultural imaginary the forging of a strong sense of European identity proves problematic This volume brings together case studies of national and regional images from across Europe which together suggest emerging patterns of identification within contemporary Europe patterns which may not necessarily amount to a European identity but rather to a European mode of identification The chronological structure of the volume demonstrates the increasingly problematic nature of national collective memories and past imaginaries in light of emergent marginal voices and images and suggests that it is both from beyond and within the national paradigm that new challenges are now reshaping the cultural imaginary of European communities Focusing on cultural images within film literature national narratives and myths museum exhibitions and architecture this volume is of interest to a wide variety of disciplines in the humanities and presents an interdisciplinary approach to questions of cultural memory and identity formation

Character Counts Michael Glenn Maness, 2010-12 **1967** Victor Brooks, 2017-11-21 Blazing hot meets icy cool in a momentous year in US history On New Year's Day in 1967 the 200 million Americans who lived in the United States were about to experience a fascinating exciting and sometimes bewildering twelve months that for many formed an iconic portion of their lives Despite the fact that the coming year produced no Black Friday Pearl Harbor or 9/11 attack the nation still underwent dramatic changes in everything from support for the Vietnam War to approval of candidates for the 1968 presidential election to attitudes toward sex with strangers and what constitutes the status quo Almost without significant forewarning Americans in 1967 witnessed a simultaneous cooling of Cold War tensions with the Soviet Union while the war in Vietnam exploded into a white hot conflict that inflicted nearly two hundred American battle deaths a week Meanwhile young people at home were alternately listening to the cool sound of the Beatles' new Sgt Pepper album and Jim Morrison's plea to get ever higher in Light my Fire On television an emotional passionate James T Kirk shared an Enterprise bridge with the cool and logical Mr Spock Victor Brooks explores what happened and in some cases did not happen to these two hundred million Americans in a national roller coaster ride that was the year 1967 He chronicles a society that proportionally had far more young people than was the case five decades later with a widely publicized generation gap that produced more arguments tension and anguish between young and old Americans than any 21st century counterpart 1967 is a fascinating wide ranging exploration including topics ranging from the first Super Bowl the beginning of the 1968 presidential campaign the social impact of the Summer of Love in San Francisco and the American combat experience in an expanding war in Vietnam The book represents a reunion of sorts for Baby Boomers as well as a guidebook for younger readers on how their elders coped with one of the definitive years of a pivotal decade
