**Science and the Great Plagues** Norman F. Cheville, 2021-03-15 Pioneer Science and the Great Plagues covers the century  
when infectious plagues anthrax tuberculosis tetanus plague smallpox and polio were conquered and details the important  
role that veterinary scientists played The narrative is driven by astonishing events that centered on animal disease the  
influenza pandemic of 1872 discovery of the causes of anthrax and tuberculosis in the 1880s conquest of Texas cattle fever  
and then yellow fever German anthrax attacks on the United States during World War I the tuberculin war of 1931 Japanese  
biological warfare in the 1940s and today s bioterror dangers Veterinary science in the rural Midwest arose from agriculture  
but in urban Philadelphia it came from medicine similar differences occurred in Canada between Toronto and Montreal As  
land grant colleges were established after the American Civil War individual states followed divergent pathways in  
supporting veterinary science Some employed a trade school curriculum that taught agriculturalists to empirically treat  
animal diseases and others emphasized a curriculum tied to science This pattern continued for a century but today some  
institutions have moved back to the trade school philosophy Avoiding lessons of the 1910 Flexner Report on medical  
education reform university associated veterinary schools are being approved that do not have control of their own  
veterinary hospitals diagnostic laboratories and research institutes components that are critical for training students in  
science Underlying this change were twin idiosyncrasies of culture disbelief in science and distrust of government that  
spawned scientology creationism anti vaccination movements and other anti science scams As new infectious plagues  
continue to arise Pioneer Science and the Great Plagues details the strategies we learned defeating plagues from 1860 to  
1960 and the essential role veterinary science played To defeat the plagues of today it is essential we avoid the digital cocoon  
of disbelief in science and cultural stasis now threatening progress      *New York Magazine* ,1989-03-27 New York magazine
