The Final Epidemic Physicians And Scientists On Nuclear War:

The Final Epidemic Bulletin of the Atomic Scientists, Ruth Adams, Susan Cullen, 1982-02-01 An analysis of the nuclear arms race examines the possibility of an atomic war and its medical effects on the world *Bulletin of the Atomic Scientists*, 1983-03 Bulletin of the Atomic Scientists, 1985-02 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world **Bulletin of the Atomic Scientists**, 1985-03 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world

The Consequences of Nuclear War on the Global Environment United States. Congress. House. Committee on Science and Technology. Subcommittee on Investigations and Oversight, 1983 **Nuclear Strategy and World Order** Louis RenÃ© Beres, The current U S nuclear strategy goes beyond the legitimate objective of survivable strategic forces to active preparation for nuclear war The Reagan administration strategy rejects minimum deterrence and prepares for a nuclear war that might be protracted and controlled The strategy reflects the understanding that a combination of counterforce targeting crises location of urban populations and ballistic missile defense could make nuclear war purposeful and tolerable The strategy includes five unwarranted assumptions 1 the Soviets might decide to launch a limited first strike on the United States or its allies 2 the USSR is more likely to be deterred by the threat of limited U S counterforce reprisals than by the threat of overwhelming total nuclear retaliation 3 victory is possible in a superpower nuclear war 4 a counterforce nuclear strategy can be undertaken without compromising the prospects of vertical and horizontal arms control and 5 peace can be maintained indefinitely via nuclear deterrence According to the author Reagan administration strategy must be reversed and an alternative strategy should be pursued The United States needs to seek a comprehensive test ban renounce the first use of nuclear weapons and institute additional weapon free zones Author NE **Radiation Nation**

Natasha Zaretsky, 2018-02-13 On March 28 1979 the worst nuclear reactor accident in U S history occurred at the Three Mile Island power plant in Central Pennsylvania Radiation Nation tells the story of what happened that day and in the months and years that followed as local residents tried to make sense of the emergency The near meltdown occurred at a pivotal moment when the New Deal coalition was unraveling trust in government was eroding conservatives were consolidating their power and the political left was becoming marginalized Using the accident to explore this turning point Natasha Zaretsky provides a fresh interpretation of the era by disclosing how atomic and ecological imaginaries shaped the conservative ascendancy Drawing on the testimony of the men and women who lived in the shadow of the reactor Radiation Nation shows that the region's citizens especially its mothers grew convinced that they had sustained radiological injuries that threatened their reproductive futures Taking inspiration from the antiwar environmental and feminist movements women at Three Mile Island

crafted a homegrown ecological politics that wove together concerns over radiological threats to the body the struggle over abortion and reproductive rights and eroding trust in authority This politics was shaped above all by what Zaretsky calls biotic nationalism a new body centered nationalism that imagined the nation as a living mortal being and portrayed sickened Americans as evidence of betrayal The first cultural history of the accident Radiation Nation reveals the surprising ecological dimensions of post Vietnam conservatism while showing how growing anxieties surrounding bodily illness infused the political realignment of the 1970s in ways that blurred any easy distinction between left and right *Bulletin of the Atomic Scientists* ,1981-08 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin s iconic Doomsday Clock stimulates solutions for a safer world *Bulletin of the Atomic Scientists* ,1983-03 **Bulletin of the Atomic Scientists** ,1984-10
