The First Of The Human Senses

The First Of The Human Senses:

The First Marx Peter Lamb, Douglas Burnham, 2018-11-15 Marx's early work is well known and widely available but it usually interpreted as at best a kind of stepping stone to the Marx of Capital. This book offers something completely different: it reconstructs from his first writings spanning from 1835 to 1846 a coherent and well rounded political philosophy. The influence of Engels upon the development of that philosophy is discussed. This it is argued was a philosophy that Marx could have presented had he put the ideas together as he hinted was his eventual intention. Had he done so this first Marx would have made an even greater contribution to social and political philosophy than is generally acknowledged today. Arguments regarding revolutionary change, contradiction and other topics such as production, alienation and emancipation contribute to a powerful analysis in the early works of Marx, one which is worthy of discussion on its own merits. This analysis is distributed among a range of books, papers, letters and other writings and is gathered here for the first time. Marx's work of the period was driven by his commitment to emancipation. Moreover, as is discussed in the conclusion to this book, his emancipatory philosophy continues to have resonance today. This new book presents Marx in a unique new light and will be indispensable reading for all studying and following his work.

A Psychology of Body, Soul, and Spirit Rudolf Steiner, 1999-06 11 lectures in Dornach, September 8-19, 1924, CW 318. Humans cannot be known by uncreative thoughts because by their very nature human beings are creative. One must re-create if one wants knowledge. With today's passive thinking one can understand only the periphery of the human being; one has to ignore the inner being. Rudolf Steiner: Today we hear a great deal about holistic medicine, an approach to healing that integrates body, mind and spirit. For Rudolf Steiner, healing is not possible unless it takes into account all the dimensions that make up a human being, both visible and invisible. Unless we begin to understand these dimensions of ourselves, real health will always be hard to attain. To meet inner frailty with truly adequate concepts, Steiner describes specific inner structures of both healthy and unhealthy states that escape ordinary perception. Addressing topics ranging from sleepwalking to hyperliteracy to the visions of St. Teresa of Avila, he suggests how to approach the misalignments of nonstandard inner structures and other psychic difficulties with what he calls pastoral medicine, a truly holistic healing that can bring body and soul together and help them function in the most effective and powerful way. Dr. Michael Lipson's foreword provides background for Steiner's lectures and brings them into the context of modern psychology. This work is a translation of *Das Zusammenwirken von Körper und Seelsorge*, CW 318. A previous edition was published as *Pastoral Medicine: The Collegial Working of Doctors and Priests*.
