[A Brain-Friendly Life](#) Marisa Menchola, 2024-10-23

Modern life is brain unfriendly. We are flooded with information and excessive cognitive demands when we are often already depleted from chronic stress, sleep deprivation, and health issues. Many of us experience frequent glitches or memory lapses despite tests showing there is nothing wrong with our brains. This book provides concrete strategies derived from neuropsychological science and clinical practice to help people improve how they function in daily life. Menchola draws on her experience as a clinical neuropsychologist who has worked with a widely diverse group of patients to translate the findings from highly controlled research into concrete strategies that people can implement in their messy worlds to make their days more brain friendly. The book also provides advice on how to address those factors that drain our brain resources and gives guidance on when and how to seek a neuropsychological evaluation. It is valuable reading for anyone experiencing frustrating cognitive problems that are not due to brain disease. It is also essential for neuropsychologists, psychologists, and physicians in primary care, psychiatry, and neurology who need a resource to offer to patients to help their healthy brains function better.
