**Designing Embedded Internet Devices** Dan Eisenreich,Brian DeMuth,2003 Embedded internet and internet appliances are the focus of great attention in the computing industry as they are seen as the future of computing The design of such devices presents many technical challenges This book is the first guide available that describes how to design internet access and communications capabilities into embedded systems It takes an integrated hardware software approach using the Java programming language and industry standard microcontrollers Numerous illustrations and code examples enliven the text This book shows how to build various sensors and control devices that connect to the TINI interfaces explains how to write programs that control them in Java and then ties them all together in practical applications Included is a discussion on how these technologies work where to get detailed specifications and ideas for the reader to pursue beyond the book The first guide to designing internet access and communications capabilities into embedded systems Takes an integrated hardware software approach using the Java programming language an industry standard

*Supercontemplations* John O'Loughlin,2022-05-12 SUPERCONTEMPLATIONS signifies a creative advance on the lower case volume of abstract poetry entitled Contemplations 1985 in that it combines upper and lower case monosyllabic words in the process of creating patterned entities which whatever their subliminal message require only to be contemplated and are thus akin to a mode of word art the only difference being that these poems were created with a word processing program rather than with a paint program involving characters
