Special Issue: Small Firm Dynamism in East Asia, 2002 **Can East Asia Compete?** Simon J. Evenett, Shahid Yusuf, 2002-09-27 East Asian economies of the 1980s and much of the 1990s were among the most competitive exporters of manufactured products and were also able to sustain

growth rates far higher than those of other countries developing or industrial. However the economic crisis of 1997-98 impacted the economies of these countries. Although recovery began fairly quickly in some countries others have yet to regain their growth momentum. Can East Asia Compete looks at whether or not East Asia can restore its near magical performance or is its competitive strength beginning to wane. This volume argues that East Asian countries have far from exhausted their growth potential. However future competitiveness will depend on much greater innovative capability in manufacturing and services innovativeness that is grounded in stronger institutions, improved macroeconomic policies and closer regional coordination. Can East Asia Compete clearly summarizes the issues currently being debated and provides guidance to East Asian economies on how to deal with the policy concerns that lie ahead. **Entrepreneurship, Small**

Business and Public Policy Robert J. Bennett, 2014-06-20. Public policy interventions aimed at encouraging supporting and developing small businesses are important for understanding entrepreneurship and small business management. This textbook is the first to provide teachers and students with a resource that gives an overview of how institutional and policy structures interact with small firm start-ups, continuation and succession failures. Beginning with a brief introduction to policy processes, the text covers the main policy instruments for entrepreneurial market entry and start-up support, for on-going small business advice and financial support and succession planning. It particularly focuses on policies that improve the Business Enabling Environment through macroeconomic policy, institutional reform and deregulation of bureaucratic burdens. Theoretical rigour is complemented by detailed assessments of current policies around the world, including USA, advanced and emerging economies and Policy support from global institutions such as the World Bank and the ILO are included. Written by a pre-eminent scholar of public policy and entrepreneurship, this textbook provides a concise but thorough introduction to the subject for Master's students internationally. Policy recommendations in the author's conclusion also highlight the book's value to policy makers as they adapt to the globalized digital world. [The Economics and Management](#)

Increasing Formality and Productivity of Bolivian Firms The World Bank, 2009-07-06 Bolivia's informal economic sector is the largest in Latin America and has been attributed to many factors including the burden of regulations the weakness of public institutions and the lack of perceived benefits to formality Increasing Formality and Productivity of Bolivian Firms presents fresh qualitative and quantitative analyses to help understand the reasons why firms are informal and the impact of formalization on their profitability in order to better inform appropriate policies A crucial finding of the study is that the impact of tax registration on profitability depends on firm size and the ability to issue tax receipts The smallest and largest firms have lower profits as a result of tax registration because their cost of formalizing exceeds benefits The study concludes by recommending policy priorities to increase the benefits of formalization through information training access to credit and markets and business support Longer term policy recommendations include simplifying formalization regulatory and taxation procedures and reducing their costs as well as measures to boost the productivity of small and micro firms
