Civil War, 1996 **Born in the U. S. A.** Timothy E. Scheurer, 2014-05-27 This is the first study to explore fully the myth of America as reflected in the nation's popular music Beginning with the songs of the Pilgrims and continuing through more than two centuries of history and music Born in the U S A shows the emerging American myth and gives a close reading of the compositions of songwriters as diverse as William Billings Henry Clay Work Irving Berlin Woody Guthrie Bob Dylan and Bruce Springsteen So that the full and diverse narrative of this complex nation might be recorded this insightful study is focused both upon the national myth and upon the songwriters and performers representing subcultures and alternative viewpoints that are the text of America's story Through hymnlike paeans and through discordant lamentations protesting the realities of the contemporary workaday world popular music is an astonishing mirror of American history

Music as Multimodal Discourse Lyndon C. S. Way, Simon McKerrell, 2017-01-26 We communicate multimodally Everyday communication involves not only words but gestures images videos sounds and of course music Music has traditionally been

viewed as a separate object that we can isolate discuss perform and listen to However much of music s power lies in its use as multimodal communication It is not just lyrics which lend songs their meaning but images and musical sounds as well The music industry governments and artists have always relied on posters films and album covers to enhance music s semiotic meaning Music as Multimodal Discourse Semiotics Power and Protest considers musical sound as multimodal communication examining the interacting meaning potential of sonic aspects such as rhythm instrumentation pitch tonality melody and their interrelationships with text image and other modes drawing upon and extending the conceptual territory of social semiotics In so doing this book brings together research from scholars to explore questions around how we communicate through musical discourse and in the discourses of music Methods in this collection are drawn from Critical Discourse Analysis Social Semiotics and Music Studies to expose both the function and semiotic potential of the various modes used in songs and other musical texts These analyses reveal how each mode works in various contexts from around the world often articulating counter hegemonic and subversive discourses of identity and belonging

You Have Not Yet Heard Your Favourite Song
Glenn McDonald, 2024-06-20 If you want to know anything about how music surfaces today how to find it or how to create it you will find what you need right here Joseph Menn Washington Post writer For the first time in history almost every song ever recorded is available instantly Everywhere This book charts what music s dazzling digital revolution really means for fans and artists As a former data guru at the world s biggest streaming service Spotify Glenn McDonald reveals What the tech giants know about you How they serve up your next song Whether fans can cheat the algorithm Whether jazz is dead and ASMR is the new punk Your chances of becoming a rock star Having analysed the streams of 500 million people McDonald explores what the data tells us about music and about ourselves from the secrets of ruse in Norway to Christmas in the Philippines Statistically you have not yet heard your lifetime s favourite song This book will take you on a voyage of discovery through music s fast flowing new waters 10 bonus playlists of wonder included About the Author Glenn McDonald is expertly placed to provide a comprehensive picture of the global music industry in the 2020s Growing up in 1980s and 1990s America he was an obsessive collector of physical music CDs and vinyl albums But he soon realised the revolutionary power of digital media to make songs more widely accessible He started doing data work at the US music intelligence startup The Echo Nest which was soon acquired by Spotify He became Spotify s Data Alchemist His website Every Noise at Once everynoise.com is an unprecedented computational map of the world s music genres Reviews If you want to know anything about how music surfaces today how to find it or how to create it you will find what you need right here And you will be highly entertained and amused in the process Joseph Menn Washington Post staff writer and author of *All the Rage* The Rise and Fall of Shawn Fanning s Napster We used to sell CDs by the weight of pallets thanks to streaming we know how our content is consumed In this immersive book Glenn has demonstrated what we can do with this knowledge so other industries facing their Napster Moment can learn from his unrivalled first mover advantage Will Page author of *Pivot*

and former Chief Economist of Spotify I'd say that reading this book is the next best thing to having an in depth impassioned hours long fika with Glenn McDonald about music and culture and all of the most burning topics of our time but I'd be lying It's even better This book is a true behind the scenes examination of our culture and our industry from the perspective of someone who was in the thick of it from the beginning It's a history of the streaming era written by someone who made history in the streaming era Meg Tarquinio PhD Spotify Twitch Nettwerk Music Group Throughout McDonald's book personal anecdotes and his own love of music spill out in witty conversational prose Even chapters that delve into streaming's complex finances unsurprisingly your 15 monthly fee does not go directly to your favourite artist but is split between that month's most streamed meaning that megastars such as Swift and Ed Sheeran stay at the top of the pyramid are told in layman's terms Poppie Platt The Daily Telegraph Extract CHAPTER 9 MERCENARIES AND FAN ARMIES Where there's an economic system there's probably fraud This is not a proud truth to admit about humanity but it seems to me to have been consistently historically true Money is supposed to be a bookkeeping mechanism but it becomes a goal Fraud and cheating existed in the music business like any business long before streaming happened Back when charts were based on people reporting sales numbers on phone calls those people could be bribed to say different numbers Radio DJs could be paid to pretend they were playing a song more because they just liked it Accounting could be manipulated Streaming doesn't necessarily make cheating easier overall but it definitely makes it more accessible to introverts Instead of making phone calls you can write computer programs that pretend to be streaming music listeners Piracy maintains a certain dastardly allure Streaming music fraud is not to be brutally honest the most glamorous or profitable form of dastrardry Streaming rewards accumulate in tiny micro transactions and the software necessary to laboriously accumulate micro royalties illegitimately isn't any easier to write than legal software for which you can get paid normal salaries It only really scales if you become a service provider selling fraud as a service and then you're a business with business problems instead of a pirate with a rakish eye patch and the sea air in your hair If you want to cheat your way to riches you're better off trying to do it in junk stocks or cryptocurrencies where there's way too much money sloshing around and the distinction between legitimate behavior and cheating is fuzzy So you might have thought that fraud wouldn't be a big issue in streaming Buy the book and carry on reading
