Songs from Unsung Worlds Bonnie Bilyeu Gordon,1985

Songs from Unsung Worlds Bonnie Bilyeu Gordon,1985 Resistance to Science in Contemporary American Poetry

Bryan Walpert,2011-09-26 This book examines types of resistance in contemporary poetry to the authority of scientific knowledge tracing the source of these resistances to both their literary precedents and the scientific zeitgeists that helped to produce them Walpert argues that contemporary poetry offers a palimpsest of resistance using as case studies the poets Alison Hawthorne Deming Pattiann Rogers Albert Goldbarth and Joan Retallack to trace the recapitulation of romantic arguments inherited from Keats Shelly and Coleridge which in turn were produced in part in response to Newtonian physics modernist arguments inherited from Eliot and Pound arguments influenced in part by relativity and quantum theory and postmodernist arguments arguments informed by post structuralist theory e g Barthes Derrida Foucault with affinities to arguments for the limitations of science in the philosophy sociology and rhetoric of science Some of these poems reveal the discursive ideologies of scientific language reveal in other words the performativity of scientific language In doing so these poems themselves can also be read as performative acts and therefore as forms of intervention rather than representation Reading Retallack alongside science studies scholar Karen Barad the book concludes by proposing that viewing knowledge as a form of intervention rather than representation offers a bridge between contemporary poetry and science **The**

Attractors is a collection of approximately 150 poems with strong links to mathematics in content form or imagery The

common theme is love and the editors draw from its various manifestations romantic love spiritual love humorous love love

between parents and children mathematicians in love love of mathematics The poets include li

Encyclopedia of

Literature and Science Pamela Gossin,2002-08-30 Science and literature have always been strange bedfellows Like puzzle

pieces they fit because they re different Some of the greatest works of world literature have been inspired by the marvels of

the scientific world Scientists have written works of the imagination Even formal scientific writings have been known to employ rhetoric There is a tendency to think of literature and the humanities in general as having little to do with science Yet scholars have conducted fruitful studies of the history and philosophy of science With the rise of technology scholars have also applied scientific analysis to the study of literature and the creative process The intersection of scientific and humanistic inquiry is finally being mapped This volume includes more than 650 A Z entries on topics and themes in science and literature significant writers key scientists seminal works and important theories and methodologies This reference defines the rapidly emerging interdisciplinary field of literature and science An introductory essay traces the history of the field its growing reputation and the current state of research Broad in scope the volume covers world literature from its beginnings to the present day and illuminates the role of science in literature and literary studies A wide range of experts contributed entries to this volume each of which concludes with a brief bibliography The entire volume closes with a list of works for further reading

Women in Science Fiction and Fantasy Robin Anne Reid, 2008-12-30 Works of science fiction and fantasy increasingly explore gender issues feature women as central characters and are written by women writers This book examines women s contributions to science fiction and fantasy across a range of media and genres such as fiction nonfiction film television art comics graphic novels and music The first volume offers survey essays on major topics such as sexual identities fandom women s writing groups and feminist spirituality the second provides alphabetically arranged entries on more specific subjects such as Hindu mythology Toni Morrison magical realism and Margaret Atwood Entries are written by expert contributors and cite works for further reading and the set closes with a selected general bibliography Students and general readers love science fiction and fantasy And science fiction and fantasy works increasingly explore gender issues feature women as central characters and are written by women writers Older works demonstrate attitudes toward women in times past while more recent works grapple with contemporary social issues This book helps students use science fiction and fantasy to understand the contributions of women writers the representation of women in the media and the experiences of women in society

Beyond: Our Future in Space Chris Impey, 2015-04-13 Expansive and enlightening Impey packs his prose with wonderful anecdotes and weird factoids New York Times Book Review Human exploration has been an unceasing engine of technological progress from the first homo sapiens to leave our African cradle to a future in which mankind promises to settle another world Beyond tells the epic story of humanity leaving home and how humans will soon thrive in the vast universe beyond the earth A dazzling and propulsive voyage through space and time Beyond reveals how centuries of space explorers from the earliest stargazers to today s cutting edge researchers all draw inspiration from an innate human emotion wanderlust This urge to explore led us to multiply around the globe and it can be traced in our DNA Today the urge to discover manifests itself in jaw dropping ways plans for space elevators poised to replace rockets at a fraction of the cost experiments in suspending and reanimating life for ultra long distance travel prototypes for solar sails that coast through

space on the momentum of microwaves released from the Earth With these ventures private companies and entrepreneurs have the potential to outpace NASA as the leaders in a new space race Combining expert knowledge of astronomy and avant garde technology Chris Impey guides us through the heady possibilities for the next century of exploration In twenty years a vibrant commercial space industry will be operating In thirty years there will be small but viable colonies on the Moon and Mars In fifty years mining technology will have advanced enough to harvest resources from asteroids In a hundred years a cohort of humans born off Earth will come of age without ever visiting humanity's home planet This is not the stuff of science fiction but rather the logical extension of already available technologies Beyond shows that space exploration is not just the domain of technocrats but the birthright of everyone and the destiny of generations to come To continue exploration is to ensure our survival Outer space a limitless unknown awaits us *Physics Envy* Peter Middleton, 2015-11-04 At the close of the Second World War modernist poets found themselves in an increasingly scientific world where natural and social sciences claimed exclusive rights to knowledge of both matter and mind Following the overthrow of the Newtonian worldview and the recent shocking displays of the power of the atom physics led the way with other disciplines often turning to the methods and discoveries of physics for inspiration In *Physics Envy* Peter Middleton examines the influence of science particularly physics on American poetry since World War II He focuses on such diverse poets as Charles Olson Muriel Rukeyser Amiri Baraka and Rae Armantrout among others revealing how the methods and language of contemporary natural and social sciences and even the discourse of the leading popular science magazine *Scientific American* shaped their work The relationship at times extended in the other direction as well leading physicists such as Robert Oppenheimer Werner Heisenberg and Erwin Schrödinger were interested in whether poetry might help them explain the strangeness of the new quantum world *Physics Envy* is a history of science and poetry that shows how ultimately each serves to illuminate the other in its quest for the true nature of things **The Alchemy of Stars** , *Literature and the Land* Emma Wood Rous, 2000 With *Literature and the Land* Rous not only inspires you the help students to become environmentally literate she provides the tools you need to make it happen *The World's Great Masterpieces* , 1901 **Science Trends** , 1985-10 *The Language Student* Bin Ramke, 1986 *The Alchemy of Stars* Roger Dutcher, Mike Allen, 2005-01-01 Since 1978 the Science Fiction Poetry Association has selected the best long and short poems in science fiction fantasy and horror for its annual Rhysling Awards named in honor of the blind poet of the spaceways from Robert Heinlein's *The Green Hills of Earth* Often considered the equivalent for poetry of the Nebula Awards for fiction the winning poems appear each year in the Nebula Awards anthologies Now for the first time the Rhysling Winners have been gathered under one cover This collection presents more than twenty five years of the best poetry in the field of speculative literature **AAAS Annual Meeting Program** American Association for the Advancement of Science. National Meeting, 1985 **Crosscurrents** , 1988

Decoding **Songs From Unsung Worlds Science In Poetry**: Revealing the Captivating Potential of Verbal Expression
