Sonoran Desert Spring:

Sonoran Desert Spring John Alcock, 1985 **When the Rains Come** John Alcock, 2009-04-17 Life in the desert is a waiting game waiting for rain And in a year of drought the stakes are especially high John Alcock knows the Sonoran Desert better than just about anyone else and in this book he tracks the changes he observes in plant and animal life over the course of a drought year Combining scientific knowledge with years of exploring the desert he describes the variety of ways in which the wait for rain takes place and what happens when it finally comes The desert is a land of five seasons featuring two summers hot dry months followed by monsoon and Alcock looks at the changes that take place in an entire desert community over the course of all five He describes what he finds on hikes in the Userly Mountains near Phoenix where he has studied desert life over three decades and where frequent visits have enabled him to notice effects of seasonal variation that might escape a casual glance Blending a personal perspective with field observation Alcock shows how desert ecology depends entirely on rainfall He touches on a wide range of topics concerning the desert s natural history noting the response of saguaro flowers to heat and the habits of predators whether soaring red tailed hawk or tiny horned lizard He also describes unusual aspects of insects that few desert hikers will have noticed such as the disruptive color pattern of certain grasshoppers that is more effective than most camouflage When the Rains Come is brimming with new insights into the desert from the mating behaviors of insects to urban sprawl and features photographs that document changes in the landscape as drought years come and go It brings us the desert in the harshest of times and shows that it is still teeming with life

Getting Over the Color Green Scott Slovic,2001 Desert vistas are often deemed vacant inhospitable wastelands Don t suggest that to Joy Harjo Pat Mora or other contemporary southwestern writers In these arid stretches often devoid of green today s southwestern writers see pyrotechnic colors and Gothic shapes that excite and often overwhelm the imagination And they capture this excitement in words that fix these desert images in the minds of readers who may too often look at the world through green colored glasses This anthology of contemporary nature writing from the Greater Southwest brings together a host of writers including peers of Edward Abbey such as Charles Bowden and Ann Zwinger and representatives of a new generation of writers such as Rick Bass and Terry Tempest Williams The book is an eclectic blend of nonfiction and fiction field notes and poetry through which artists of diverse backgrounds both celebrate and illuminate the unique vitality and complexity of southwestern literature proving that green is only one of many colors on their palette The selections included here range all across the southwestern landscape and explore adventures in the wild topics in natural history living close to the land and efforts at conservation and restoration They clearly demonstrate that there is grace and beauty in this often maligned part of the world both in the human traditions that have developed in the region and in the natural features of the desert itself
