**Globalization and Civilizations** Mehdi Mozaffari,2003-09-02 Globalization and Civilizations challenges established assumptions about the nature of civilizations and the supposed inevitability of the conflict between the Islamic and Western worlds Uniquely this edited book critically interrogates the concept of civilization by asking whether it is still valid in the globalized world economy of the twenty first century The first half of the book provides an historical and theoretical context to understand the idea of civilization in political science and demonstrates how the various social economic political and cultural processes of globalization have radically altered perceptions of civilization The second half of the book looks particularly at non Western examples of the interaction between globalization and civilization and includes case studies on the Arab world Islam China India and Europe *Russia's World Order* Paul Robinson,2025-04-15 Russia s World Order explores the ideas underlying the undeclared New Cold War between Russia and the West The first Cold War was a struggle between capitalism and communism most Western politicians and policymakers imagine the new one to be a struggle between democracy and autocracy Russia s World Order explains that in Russian eyes the conflict is about something very different it is a fight between two incompatible visions of where history is leading Russia s World Order describes the civilizational theory that has come to dominate Russian official discourse andthat has come to dominate Russian official discourse and that is being used by the Russian state to justify its clashes with the West Whereas the West promotes a vision of history that drives all nations toward convergence on a single social political and economic model that of modern Western liberalism Russia s political leaders increasingly portray the world as consisting of numerous distinct civilizations each diverging toward its own unique destination The Russian state portrays itself as defending the right of all civilizations to chart their own independent path of development and is having some success in using this logic to win allies around the world Paul Robinson recounts how ideas of inevitable convergence once dominated Russian thought as well but were gradually pushed out by civilizational theories He outlines where these theories came from what they propose and how they became popular Russia s World Order thereby reveals the true nature of today s New Cold War and the challenge that Russian civilizationism poses to the West **Style and Civilizations** Alfred Louis Kroeber,1963 *Rough Dialectics* Palmer Talbutt Jr.,2022-07-11 This is an exploration in depth of the social theory of the Russian born thinker Pitirim A

Sternberg, 2016-07-15 How can creative individuals and societies adapt to complex 21st century conditions Will civilizations thrive or collapse in the decades to come if they are not creative enough or if they are too creative Interest in these questions is growing however until now there has been inadequate understanding of the socioeconomic and cultural trends and issues that influence creativity This book provides that understanding while yielding insights from many of the world's leading creativity researchers and educational experts The book begins with a big picture interdisciplinary overview of the socioeconomic cultural and technological pressures emerging from 21st century globalization and describes some ways in which those pressures simultaneously suppress distort and invigorate creativity in general and creative education in particular After that prominent scholars of creativity and education use their impressive knowledge bases to clarify how we can adjust our thoughts and actions in order to give ourselves the best possible chances for success in this complex world The world's problems are complex messy and seemingly intractable but history tells us that human creativity finds solutions to even the most daunting problems This book collects perspectives on creative development from many of the most respected scholars and educators working in creativity and innovation today helping chart a path forward for creativity in the 21st century Jonathan Plucker Julian C Stanley Endowed Professor of Talent Development Johns Hopkins University A volume taking on macro opportunities and macro problems by editors Ambrose and Sternberg is a treat for readers who want to think big and think forward Kick back

L. Kroeber, 2023-11-15 This title compiles influential essays by Alfred Kroeber written in the last decade of his life reflecting his deep exploration of human culture civilization and history through an anthropological lens Curated by Milton Singer and Theodora Kroeber this collection showcases Kroeber s unique perspective on the intersections of anthropology history and the humanities Rather than focusing solely on ethnology or linguistic analysis Kroeber broadens his scope to address questions about style civilization patterns and the historical continuity of cultures His view of anthropology as a young

evolving science with ancient philosophical roots demonstrates his belief in the discipline's role in understanding human progress. The volume aims to engage both historians and anthropologists by presenting Kroeber's reflections on culture and the human condition especially for a generation of scholars and students whose approach to anthropology is less historically oriented. Kroeber's personal approach to his field developed over a lifetime of teaching and exploring anthropological themes such as Culture Growth emphasizes the evolving nature of culture as an aggregate that shapes civilizations and values. By tracing Kroeber's intellectual journey the book underscores the importance of historical context in anthropology positioning it as a field capable of enriching broader humanistic inquiries and advancing our understanding of civilization's aesthetic, ethical, and structural evolution. This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1963.

*Vladimir Sorokin's Discourses* Dirk Uffelmann, 2020-04-21

Vladimir Sorokin is the most prominent and the most controversial contemporary Russian writer. Having emerged as a prose writer in Moscow's artistic underground in the late 1970s and early 80s, he became visible to a broader Russian audience only in the mid 1990s with texts shocking the moralistic expectations of traditionally minded readers by violating not only Soviet ideological taboos but also injecting vulgar language, sex, and violence into plots that the postmodernist Sorokin borrowed from nineteenth-century literature and Socialist Realism. Sorokin became famous when the Putin youth organization burned his books in 2002 and he picked up neo-nationalist and neo-imperialist discourses in his dystopian novels of the 2000s and 2010s, making him one of the fiercest critics of Russia's new middle ages while remaining steadfast in his dismantling of foreign discourses.

This book covers the earliest civilizations and the great powers in the Near East, moving on to the first Aegean civilizations, the Mediterranean world in the first millennium, Imperial Rome, northeast Africa, the divine kings in southeast Asia, and empires in East Asia, as well as early states in the Americas and Andean civilization. *Ancient Civilizations* includes a number of features to support student learning: a wealth of images including several new illustrations, feature boxes which expand on key sites, finds, and written sources, and an extensive guide to further reading. With new perceptions of the origin and collapse of states, including a review of the issue

of sustainability this fourth edition has been extensively updated in the light of spectacular new discoveries and the latest theoretical advances Examining the world's pre industrial civilizations from a multidisciplinary perspective and offering a comparative analysis of the field which explores the connections between all civilizations around the world Scarre and Fagan both established authorities on world prehistory provide a valuable introduction to pre industrial civilizations in all their brilliant diversity

**Rethinking Civilizational Analysis** Said Amir Arjomand, Edward A Tiryakian, 2004-06-09 At last a volume on civilization that truly reflects the complexity of multiple civilizations The wealth of contributions Arjomand and Tiryakian have assembled demonstrates the value of an old concept for understanding the awful dilemmas confronting human kind in the global age Its thoroughgoing renewal here establishes this book as the essential benchmark for future scholars of civilization Martin Albrow Founding Editor of International Sociology and author of The Global Age winner of the European Amalfi Prize 1997 In our tension filled world many are heralding and others fearing a clash of civilizations The contributors to this volume provides a healthy and persuasive argument about why this clash need not and certainly should not take place They do so moreover not by rejecting the concept of civilization but by developing a less primordial homogenous and essentialist concept of it An important collection that provides illumination in this sometimes frighteningly dark time Jeffrey Alexander Professor and Chair of Sociology at Yale University The concept of civilization may well replace the notions of globalization and identity as the core component in the vocabulary of 21st century sociology The authors contribute a great deal to the clarification of fashionable controversies around the clash of civilizations and multiculturalism They go a long way toward purging the concept of civilization of its ideological overtones and they succeed admirably in turning it into powerful analytic tool of an emerging field of macrosociology known already as civilizational analysis Piotr Sztompka President International Sociological Association Although the concept of civilization has deep roots in the social sciences there is an urgent need to re think it for contemporary times This book points to an exhaustion in using the nation state and world system as the basic macro units of social analysis because they do not get to grips with the soft power variable of cultural factors involved in global aspects of development Also globalization requires us to reconsider the link between civilization and a fixed or given territory This book focuses upon the dynamic aspect of civilizations Among the topics covered are Civilizational analysis and social theory Global civilization and local cultures Civilizational forms Rationalization and Civilization Civilizations as zones of prestige Historical and comparative dimensions of civilization The clash of civilizations
