Reading Reality E. Thomas Finan, 2021-02-03 In the early 1800s American critics warned about the danger of literature as a distraction from reality Later critical accounts held that American literature during the antebellum period was idealistic and that literature grew more realistic after the horrors of the Civil War By focusing on three leading American authors Ralph Waldo Emerson Walt Whitman and Emily Dickinson *Reading Reality* challenges that analysis Thomas Finan reveals how antebellum authors used words such as *real* and *reality* as key terms for literary discourse and claimed that the real was in fact central to their literary enterprise He argues that for many Americans in the early nineteenth century the real was often not synonymous with the physical world It could refer to the spiritual the sincere or the individual's experience He further explains how this awareness revises our understanding of the literary and conceptual strategies of American writers By unpacking antebellum senses of the real Finan casts new light on the formal traits of the period's literature the pressures of the literary marketplace in nineteenth century America and the surprising possibilities of literary reading

The Revivifying Word Clayton Koelb, 2008 Reading as key to the mysterious relation between lifeless material bodies and living animate beings in Romantic fiction and thought What is not Life that really is asked Coleridge struggling like many poets philosophers and scientists of Europe's Romantic age to formulate a theory of life that explained the mysterious relation between dead material bodies and living animate beings Romantic intellectuals found a key to this mystery surprisingly close at hand the process by which dead matter could come to life must be something like the process of reading The *Revivifying Word* examines the reanimating acts of reading that became a central focus of attention for Romantic writers German theorists building on the Apostle Paul's assertion that the dead letter can be revived by the living spirit proposed a permeable legible boundary between the living and the dead This inaugurated a revolution in European aesthetics implanting the germ of an extraordinarily productive narrative idea that enriched Romantic literature for decades Poets and novelists created a large cast of characters who crossed the boundary between death and life with the help of some form of reading figures like Keats's Glaucus Kleist's Elizabeth Kohlhaas Shelley's Frankenstein and the monster he creates Maturin's Melmoth Poe's Madeline Usher and Gautier's Spirite Clayton Koelb demonstrates that such fictions offer a nuanced consideration of the most urgent question facing any theory of life how do material bodies come to acquire to lose and then perhaps to regain the immaterial intellectual spiritual quality that defines animate beings Clayton Koelb is Guy B Johnson Professor of German English and Comparative Literature and Chair of the Department of Germanic Languages and Literatures at the University of North Carolina Chapel Hill

Spaces of Honor Heikki Lempa, 2021-08-16 The common understanding is that honor belongs to a bygone era whereas civil society belongs to the future and modern society Heikki Lempa argues that honor was not gone or even in decline between 1700 and 1914 and that civil society was not new but had long roots that stretched into the Middle Ages In fact what is peculiar for this era in Germany were the deep connections between practices of honor and civil society This study focuses on collective actions of honor and finds them in a series of case studies at such communal spaces as schools theaters lunch and dinner tables spas workers strikes and demonstrations It is in these collective actions that we see civil society in making The *Spaces of Honor* sees civil society not primarily as an idea or an intellectual project but as a set of practices shaped in physical spaces Around 1700 the declining power of religious authorities allowed German intellectuals to redefine civil society starting with a new language of honor Then in the middle of the eighteenth century an increasing number of voluntary associations and public spaces turned it into reality Here honor provided cohesion In the nineteenth century urbanization and industrialization ushered in powerful forces of atomization that civil society attempted to remedy The remedy came from social and physical spaces that generated a culture of honor and emotional belonging We find them in voluntary associations spas revived guilds and labor unions By the end of the nineteenth century honor was

deeply embedded in German civil society **The Last Man** Mary Shelley, 1996-09-11 Mary Shelley's third published novel *The Last Man* is a disillusioned vision of the end of civilization set in the twenty-first century. The book offers a sweeping account of war, plague, love, and desolation. It is the sort of apocalyptic vision that was widespread at the time, though Shelley's treatment of the theme goes beyond the conventional; it is extraordinarily interesting and deeply moving. If *The Last Man* is in some sense a conventional text of the period, it is also intensely personal in its origin. Shelley refers in her journal to the last man as her alter ego, the last relic of a beloved race, my companions extinct before me. The novel thus develops out of and contributes to a network of story and idea in which fantasy, allusion, convention, and autobiography are densely interwoven. This new version of the first edition (1826) sets out to provide not only a thoroughly annotated text but also contextual materials to help the reader acquire knowledge of the intellectual and literary milieu out of which the novel emerged. Appendices include material on the last man as early nineteenth-century hero, texts from the debate initiated by Malthus in 1798 about the adequacy of food supply to sustain human population, various accounts of outbreaks of plague, and Shelley's poems representing her feelings after the death of her husband.

The Collected Writings of Franz Liszt Janita R. Hall-Swadley, 2012-04-20 During his early years, Franz Liszt worked as a traveling piano virtuoso; his adventures highlighted by his entrance into the literary world as a correspondent for the most popular French journals of his time. In this second volume of Janita Hall Swadley's *The Collected Writings of Franz Liszt*, Liszt's work as a music essayist and journalist is on full display. In his essays, readers will see the influence of the revolutionary theories of Hugues Felicité Robert de Lamennais, Victor Hugo, and François-René de Chateaubriand, as Liszt boldly calls for social reforms on behalf of musicians and musical institutions, from demands for a repertoire of church music of divine praise to the timely publication of inexpensive music editions. In addition to Liszt's scandalous review of Sigismond Thalberg and the fiery exchange that ensued, the essays include his testimonies to living composers Giacomo Meyerbeer and Robert Schumann and the recently deceased Niccolò Paganini. Alongside the essay, this new translation of Liszt's letters opens a window onto the composer's immersion in the Italian countryside, where he paints a portrait of a rich musical landscape. Liszt regales his correspondents with amusing anecdotes at Sand's Italian country estate in Nohant, describes the beautiful landscape and artistic treasures of Italy from his residence on Lake Como, defends himself from Heinrich Heine's accusations of his ill-seated character, discusses the religious aesthetic of Raphael's painting, and offers his thoughts on the interconnectedness of all the arts. Including two complete facsimile reproductions of the existing manuscripts for *De la situation des artistes* and *Sur Paganini propos de sa mort*, *Essays and Letters of a Traveling Bachelor of Music* is a must-read for student and scholars of 19th-century classical music.

The Forge of Vision David Morgan, 2015-10-27 Religions teach their adherents how to see and feel at the same time; learning to see is not a disembodied process but one hammered from the forge of human need, social relations, and material practice. David Morgan argues that the history of religions may therefore be studied through the lens of their salient visual themes.

The Forge of Vision tells the history of Christianity from the sixteenth century through the present by selecting the visual themes of faith that have profoundly influenced its development After exploring how distinctive Catholic and Protestant visual cultures emerged in the early modern period Morgan examines a variety of Christian visual practices ranging from the imagination visions of nationhood the likeness of Jesus the material life of words and the role of modern art as a spiritual quest to the importance of images for education devotion worship and domestic life An insightful informed presentation of how Christianity has shaped and continues to shape the modern world this work is a must read for scholars and students across fields of religious studies history and art history [Listen to This](#) Alex Ross,2025-09-23 One of The Telegraph s Best Music Books 2011 Alex Ross s award winning international bestseller The Rest Is Noise Listening to the Twentieth Century has become a contemporary classic establishing Ross as one of our most popular and acclaimed cultural historians Listen to This which takes its title from a beloved 2004 essay in which Ross describes his late blooming discovery of pop music showcases the best of his writing from more than a decade at The New Yorker These pieces dedicated to classical and popular artists alike are at once erudite and lively In a previously unpublished essay Ross brilliantly retells hundreds of years of music history from Renaissance dances to Led Zeppelin through a few iconic bass lines of celebration and lament He vibrantly sketches canonical composers such as Schubert Verdi and Brahms gives us in depth interviews with modern pop masters such as Bj rk and Radiohead and introduces us to music students at a Newark high school and indie rock hipsters in Beijing Whether his subject is Mozart or Bob Dylan Ross shows how music expresses the full complexity of the human condition Witty passionate and brimming with insight Listen to This teaches us how to listen more closely *From Self to Selfie* Angus Kennedy,James Panton,2019-08-14 This edited collection charts the rise and the fall of the self from its emergence as an autonomous agent during the Enlightenment to the modern day selfie self whose existence is realised only through continuous external validation Tracing the trajectory of selfhood in its historical development from the Reformation onwards the authors introduce the classic liberal account of the self based on ideas of freedom and autonomy that dominated Enlightenment discourse Subsequent chapters explore whether this traditional notion has been eclipsed by new more rigid categories of identity that alienate the self from itself and its possibilities what I am it seems has become more important than what I might make of myself These changing dynamics of selfhood the transition From Self to Selfie reveal not only the peculiar ways in which selfhood is problematized in contemporary society but equally the tragic fragility of the selfie in the absence of any social authority that could give it some security
