N.S. Trubetzkoy N. S. Trubetzkoy, 2001 Edited and with an introduction by Anatoly Liberman Translated by Marvin Taylor and Anatoly Liberman N S Trubetzkoy 1890 1939 is generally celebrated today as the creator of the science of phonology While his monumental *Grundz ge der Phonologie* was published posthumously and contains a summary of Trubetzkoy s late views on the linguistic function of speech sounds there has until now been no practical way to trace the development of his thought or to clarify the conclusions appearing in that later work With the publication of *Studies in*

General Linguistics and Language Structure not only will linguists have that opportunity but a collection of Trubetzkoy's work will appear in English for the first time Translated from the French German and Russian originals these articles and letters present Trubetzkoy's work in general and on Indo European linguistics The correspondence reprinted here also for the first time in English is between Trubetzkoy and Roman Jakobson The resulting collection offers a view of the evolution of Trubetzkoy's ideas on phonology the logic in laws of linguistic geography and relative chronology and the breadth of his involvement with Caucasian phonology and the Finno Ugric languages A valuable resource this volume will make Trubetzkoy's work available to a larger audience as it sheds light on problems that remain at the center of contemporary linguistics

evidence based explanation **Tilogos** Sherman P. Bastarache, 2012-04 Language is so easily learned that children master it in the very early stages of life The expression of self through language is based in innate instincts but it must be learned It can be as simple as adding blocks together to spell words the only difference is that it consists of adding phonemes together These phonemes are derived from grunts and calls and are strung together to form words or Tilogos which are combined into sound click s with definitive meaning In order to understand the evolution of language from calls and cries to modern articulation we must first understand how the most basic of guttural sounds was originally used to represent a species recognizable concept in the earliest stages of interpersonal communication From there we must strive to understand how these basic sounds are manipulated and strung together to create complex words with varying meaning representative of anything from items in one s surroundings to intangible thoughts and emotions At its heart Tilogos explores the question of how human beings have developed the ability to use simple noises to represent the most complex aspects of our shared world
