The Aesthetics and Affects of Cuteness Joshua Paul Dale, Joyce Goggin, Julia Leyda, Anthony P. McIntyre, Diane Negra, 2016-12-08 Cuteness is one of the most culturally pervasive aesthetics of the new millennium and its rapid social proliferation suggests that the affective responses it provokes find particular purchase in a contemporary era marked by intensive media saturation and spreading economic precarity Rejecting superficial assessments that would deem the ever expanding plethora of cute texts trivial The Aesthetics and Affects of Cuteness directs serious scholarly attention from a variety of academic disciplines to this ubiquitous phenomenon The sheer plasticity of this minor aesthetic is vividly on display in this collection which draws together analyses from around the world examining cuteness s fundamental role in cultural expressions stemming from such diverse sources as military cultures high end contemporary art worlds and animal shelters Pushing beyond prevailing understandings that associate cuteness solely with childhood or which posit an interpolated parental bond as its primary affective attachment the essays in this collection variously draw connections between cuteness and the social political economic and technological conditions of the early twenty first century and in doing so generate fresh understandings of the central role cuteness plays in the recalibration of contemporary subjectivities

Cosmopolitan Power in International Relations Giulio M. Gallarotti, 2010-09-27 How can nations optimize their power in the modern world system Realist theory has underscored the importance of hard power as the ultimate path to

national strength In this vision nations require the muscle and strategies to compel compliance and achieve their full power potential But in fact changes in world politics have increasingly encouraged national leaders to complement traditional power resources with more enlightened strategies oriented around the use of soft power resources The resources to compel compliance have to be increasingly integrated with the resources to cultivate compliance Only through this integration of hard and soft power can nations truly achieve their greatest strength in modern world politics and this realization carries important implications for competing paradigms of international relations The idea of power optimization can only be delivered through the integration of the three leading paradigms of international relations Realism Neoliberalism and Constructivism

Counter-terrorism Jonathan Stevenson,2020-10-28 The 9 11 attacks revealed that the transnational terrorist threat facing the US and its partners was far more dangerous than most had previously discerned It was now clear that al Qaeda intended to and could threaten the West s particularly the US political and military leverage with the aim of shifting the balance of power from the West to Islam after a violent global confrontation In that sense the new terrorist threat is strategic and it has led to a worldwide mobilisation comparable to that required by a world war This Paper argues that prevailing in the war on terror much like victory in the Cold War entails containment deterrence outperformance and engagement Military power is secondary to intelligence law enforcement enlightened social policy and diplomacy Diplomatic engagement with the larger Muslim world is paramount as a means of denying al Qaeda not merely recruits but the clash of civilisations it seeks The US led intervention in Iraq though intended to introduce democratic reform in the wider Middle East has so far antagonised Islam and strengthened Islamist terrorism This suggests that coercive or aggressively ideological diplomacy is unlikely to win over an Islamic population biased by anti Western propaganda Successful Western diplomacy will have to be discreet nuanced and incremental

United States - Africa Security Relations Kelechi A. Kalu,George Klay Kieh,2013-11-07 United States Africa relations have experienced four major cycles The

first cycle was during the Cold War 1960 1990 During this period the U S developed a one sided relationship with various African states in which the latter served as foot soldiers for the U S in its competition with the Soviet Union for global domination Among other things the various client African states provided the U S with access to airfields deep water ports and sites for the establishment of various intelligence gathering facilities In addition the U S used various groups like UNITA led by Jonas Savimbi in Angola to undermine and fight pro Soviet regimes on the continent The second cycle of the relationship covered the period 1991 1998 During this time the U S scaled down its security activities in Africa The major reason was that with the end of the Cold War Africa with few exceptions like Egypt was no longer a major front for the promotion of U S Security interests The third cycle commenced in 1998 and ended in 2001 This period was characterized by the U S search for an approach to frame its security relations with Africa In this vein the U S undertook various military security initiatives The fourth cycle began after the 9 11 terrorist attacks against the American homeland Since then the U S has expanded the scope of its security relations with Africa as reflected in the establishment of various initiatives and programs At the core is the prosecution of the American war on terror Against this backdrop this book examines some of the major dimensions of the U S security relations with Africa including American security interests on the continent the war on terror AFRICOM and military cooperation Using the book s integrative theoretical framework each of the chapters in the volume examines the various factors that shape the issue of focus

Just Policing, Not War Gerald Schlabach, 2007 2008 Catholic Press Association Honorable Mention For decades the Catholic Church and historical peace churches such as the Mennonites have come together in ecumenical discussions about war and peace The dividing point has always been between pacifism the view held by Mennonites and other peace churches and the just war theory that dominates Catholic thinking on the issue Given the transformation of global relations over this period increased interdependency and communication as well as the fall of the Soviet Union emerging nationalism movements and the slow development of international courts the time is right to rethink the Christian response to war Gerald Schlabach has proposed just policing theory as a way to narrow the gap between just war and pacifist traditions If the world can address problems of violence through a police model instead of a conventional military model there may be a role for Christians from all traditions In this volume Schlabach presents his theory and has invited a number of scholars representing Catholic Mennonite and other traditions to respond to the theory and address a number of key questions What do we mean by policing Can policing solve conflicts beyond one s own borders How does just policing theory address terrorism Is international policing possible and what would it look like Is just policing a Christian solution that meets the criteria of both traditions This important volume offers a fresh and meaningful discussion to help Christians of all traditions navigate the difficult questions of how to live in these times of violence and war
