The Berlin Airlift:

To Save a City Roger G. Miller, 2008-04-21 Following World War II the Soviet Union drew an Iron Curtain across Europe crowning its efforts with a blockade of West Berlin in a desperate effort to prevent the creation of an independent democratic West Germany The United States and Great Britain aided by France responded with a daring air logistical operation that in fifteen months delivered almost three million tons of coal food and other necessities to the people of Berlin Now drawing on rare U S Air Force files recently declassified documents from the National Archives records released since the collapse of the Soviet Union and the memories of airlift veterans themselves Roger G Miller provides an original study of the Berlin Airlift The Berlin Airlift was an enterprise of epic proportions that demonstrated the power of air logistics as a political instrument What began as a hastily organized operation by a small number of warweary cargo airplanes evolved into an intricate bridge of aircraft that flowed in and out of Berlin through narrow air corridors Hour after hour day after day week after week a stream of airplanes delivered everything from food and medicine to coal and candy in defiance of breakdowns inclement weather and Soviet hostility And beyond the airlift itself a complex system of transportation maintenance and supply stretching around the world sustained operations Historians veterans and general readers will welcome this history of the first Western victory of the Cold War Maps diagrams and more than forty photographs illustrate the mechanical inner workings and the human faces that made that triumph possible

The Berlin Airlift Barry Turner, 2017-10-05 Acclaimed historian Barry Turner presents a new history of the Cold War s defining episode Berlin 1948 a divided city in a divided country in a divided Europe The ruined German capital lay 120 miles inside Soviet controlled eastern Germany Stalin wanted the Allies out the Allies were determined to stay but had only three narrow air corridors linking the city to the West Stalin was confident he could crush Berlin s resolve by cutting off food and fuel In the USA despite some voices still urging America first it was believed that a rebuilt Germany was the best insurance against the spread of communism across Europe And so over eleven months from June 1948 to May 1949 British and American aircraft carried out the most ambitious airborne relief operation ever mounted flying over 2 million tons of supplies on almost 300 000 flights to save a beleaguered Berlin With new material from American British and German archives and original interviews with veterans Turner paints a fresh vivid picture the airlift whose repercussions the role of the USA as global leader German ascendancy Russian threat we are still living with today

To Save a City Roger Gene Miller, 1998 Like the rest of Germany Berlin had suffered enormous damage In May 1945 2 8 million people remained in the city down from a prewar population of 4 6 million In the confusion of ending the war Allied planners overlooked a significant detail no formal agreement guaranteed Western access by surface transportation Air routes were another matter in 1945 concerns about air safety led to a written guarantee signed by all participating nations The wartime illusion that the United States could work with a friendly Soviet Union died a relatively quick and probably inevitable death in the post war period Unification of the Western zones of occupation meant introducing

a single currency that would be outside Soviet control In response Stalin ordered a progressively tightening blockade around the city

To Save A City: The Berlin Airlift, 1948-1949 [Illustrated Edition] Roger G. Miller, 2015-11-06 Includes 30 Illustrations In this expert survey Air Force Historian Robert Miller explores the Epic story of the Berlin Airlift the confrontation of Democracy and Communism as the world teetered on the brink of the Third World War The Berlin blockade 24 June 1948 12 May 1949 was one of the first major international crises of the Cold War During the multinational occupation of post World War II Germany the Soviet Union blocked the Western Allies railway road and canal access to the sectors of Berlin under allied control The Soviets offered to drop the blockade if the Western Allies withdrew the newly introduced Deutschmark from West Berlin In response the Western Allies organised the Berlin airlift to carry supplies to the people in West Berlin Aircrews from the United States Air Force the British Royal Air Force the Royal Canadian Air Force the Royal Australian Air Force the Royal New Zealand Air Force and the South African Air Force flew over 200 000 flights in one year providing up to 8 893 tons of necessities daily such as fuel and food to the Berliners Neither side wanted a war the Soviets did not disrupt the airlift By the spring of 1949 the airlift was clearly succeeding and by April it was delivering more cargo than had previously been transported into the city by rail On 11 May 1949 the USSR lifted the blockade of West Berlin The Berlin Crisis of 1948 1949 served to highlight competing ideological and economic visions for post war Europe particularly Germany The clash ultimately led to the division of that country into East and West and to the division of Berlin itself

The Blockade Breakers Helena P Schrader, 2011-09-30 On 24 June 1948 the Soviet Union abruptly closed all land and water access to the Western Sectors of Berlin Over 2 million civilians dependent on the surrounding territory and the West for food fuel and other basic goods were suddenly cut off from all necessities of life The Western Allies had the option of withdrawing their garrisons and allowing the Soviet Union to take control of the entire of city or of trying to supply the city by air Never in history had 2 million people been supplied exclusively by air before None of senior military commanders believed it could be done But the political leadership in London and Washington insisted that it must be done So the largest and most ambitious Airlift in history was set in motion It began without the West really knowing what the Berliners needed in order to survive much less how much those supplies weighed It was launched despite an almost complete absence of aircraft and aircrew resources in Germany and despite the serious inadequacies in airfields and air traffic control It was launched without airlift expertise in theatre or a unified command structure But once it was took wing it flew and turned into something that not even its originators and advocates had ever imagined or expected

The Berlin Airlift John Grehan, 2020-11-12 Stuffed with great images and perfectly detailed information superbly illustrating one of the first major international crises of the Cold War Vintage Airfix During the multinational occupation of post World War II Germany Stalin decided to make the Allied hold on West Berlin untenable by shutting down all the overland routes used to keep the city supplied The choice faced by the Allies was a stark one let Berlin fall or risk war with the Soviets by breaking the Soviet

stranglehold In a remarkably visionary move the Allies decided that they could keep Berlin supplied by flying over the Soviet blockade thus avoiding armed conflict with the USSR On 26 June 1948 the Berlin Airlift began Throughout the following thirteen months more than 266 600 flights were undertaken by the men and aircraft from the US France Britain and across the Commonwealth which delivered in excess of 2 223 000 tons of food fuel and supplies in the greatest airlift in history The air bridge eventually became so effective that more supplies were delivered to Berlin than had previously been shipped overland and Stalin saw that his bid to seize control of the German capital could never succeed At one minute after midnight on 12 May 1949 the Soviet blockade was lifted and the Soviet advance into Western Europe was brought to a shuddering halt The book is packed full of fascinating photographs detailing the huge variety of aircraft involved in the airlift each accompanied by detailed explanations and text The book is a fitting tribute to the aircrew who lost their lives in this incredible operation Army Rumour Service ARRSE [The Berlin Airlift](#) Michael Burgan,2008 Discusses the hardships West Berlin residents faced during a period in which Western Allies United States United Kingdom France attempted to deliver aid to a city devastated by war and political turmoil The success of the airlift kept Berlin free from total Soviet occupation until the eventual reunification of Germany Features include journal entries letters and personal interviews **The Berlin Airlift** Jon Sutherland,Diane Canwell,2007-06-21 In June 1948 Joseph Stalin halted all road and rail traffic in to and out of the Allied sector of Berlin and cut off all electricity to the city The only route into Berlin was by means of three twenty mile wide air corridors across the Soviet zone of Germany Thus the wartime allies of Britain France and the USA realized that the only option open to them was to supply the beleaguered West Berlin by air transport and so started one of the most dramatic events of the twentieth century The airlift started in June 1948 At the beginning there were three loading airfields Rhein Main and Wiesbaden in the American zone and Weinstorf in the British zone By September of 1948 the airlift was transporting a massive tonnage of supplies into Berlin including coal food medical supplies and all the other necessities of life A mixed fleet of aircraft plodded their endless path to and from the city Both Ex planes and pilots were dragged out of retirement In September 1948 the Russian military threatened to force down western aircraft if they flew outside the 20 mile wide corridors but by March 1949 a total of 45 683 tons of supplies per week were being flown into Berlin In April Russia finally announced her intention to end the blockade [Bridge Across the Sky](#) Richard Collier,1978 Cold War Berlin Airlift Berlin Blockade Berlin Luftbroen 1948 1948 Tyskland Historie 1948 1949 Berlin blokaden Tunner William Sokolovsky V D Tempelhof Reuter E NATO Clay L d B Clay s Pigeons Bradley O Ganeval J Howley F [The Berlin Airlift](#) Charles River Charles River Editors,2015-10-08 Includes pictures Includes accounts of the blockade and airlift by Berliners American officials and pilots Includes online resources and a bibliography for further reading Includes a table of contents Here in Berlin one cannot help being aware that you are the hub around which turns the wheel of history If ever there were a people who should be constantly sensitive to their destiny the people of Berlin East and West should be they Martin Luther King Jr In the

wake of World War II the European continent was devastated and the conflict left the Soviet Union and the United States as uncontested superpowers This ushered in over 45 years of the Cold War and a political alignment of Western democracies against the Communist Soviet bloc that produced conflicts pitting allies on each sides fighting even as the American and Soviet militaries never engaged each other Though it never got hot between the two superpowers the Cold War was a tense era until the dissolution of the USSR and nothing symbolized the split more than the division of Berlin Berlin had been a flashpoint even before World War II ended and the city was occupied by the different Allies even as the close of the war turned them into adversaries If anyone wondered whether the Cold War would dominate geopolitics any hopes that it wouldn't were dashed by the Soviets blockade of West Berlin in April 1948 ostensibly to protest the currency being used in West Berlin but unquestionably aiming to extend their control over Germany's capital By cutting off all access via roads rail and water the Soviets hoped to force the Allies out and at the same time Stalin's action would force a tense showdown that would test their mettle In response to the blockade the British Americans Canadians and other Allies had no choice but to either acquiesce or break the blockade by air hoping correctly that the Soviets wouldn't dare shoot down planes being used strictly for civilian purposes Over the course of the next year over 200 000 flights were made to bring millions of tons of crucial supplies to West Berlin with the Allies maintaining a pace of landing a plane in West Berlin every 30 seconds at the height of the Airlift As the success of the Berlin Airlift became clear the Soviets realized the blockade was ineffective and both sides were able to save face by negotiating an end to the blockade in April 1949 with the Soviets ending it officially on May 12 The Airlift would technically continue until September but for all intents and purposes the first crisis of the Cold War had come to an end and most importantly the confrontation remained cold For the next decade West Berlin remained a haven for highly educated East Germans who wanted freedom and a better life in the West and this brain drain was threatening the survival of the East German economy In order to stop this access to the West through West Berlin had to be cut off so in August 1961 Soviet premier Nikita Khrushchev authorized East German leader Walter Ulbricht to begin construction of what would become known as the Berlin Wall The wall begun on Sunday August 13 would eventually surround the city in spite of global condemnation and the Berlin Wall itself would become the symbol for Communist repression in the Eastern Bloc The Berlin Airlift The History and Legacy of the First Major Crisis of the Cold War chronicles the history that led to the Soviet blockade and the famous relief efforts undertaken to beat it Along with pictures of important people places and events you will learn about the Berlin Airlift like never before in no time at all
