The Light/dark Universe James Martin Overduin, Paul S. Wesson, 2008 To the eyes of the average person and the trained scientist the night sky is dark even though the universe is populated by myriads of bright galaxies Why this happens is a question commonly called Olbers Paradox and dates from at least 1823 How dark is the night sky is a question which preoccupies astrophysicists at the present The answer to both questions tells us about the origin of the universe and the nature of its contents luminous galaxies like the Milky Way plus the dark matter between them and the mysterious dark energy which appears to be pushing everything apart In this book the fascinating history of Olbers Paradox is reviewed and the intricate physics of the light dark universe is examined in detail The fact that the night sky is dark a basic astronomical observation that anybody can make turns out to be connected with the finite age of the universe thereby confirming some event like the Big Bang But the space between the galaxies is not perfectly black and data on its murkiness at various wavelengths can be used to constrain and identify its unseen constituents

Planning and Designing Research Animal Facilities Jack Hessler,Noel Lehner,2011-04-28 Research institutions have or are planning to build expand and renovate animal research facilities to keep up with the demands of biomedical research caused in part by growth in the use of genetically altered rodents and the upsurge of research in infectious diseases Properly designed facilities greatly facilitate effective management and high quality day to day animal care that is required to

optimally support animal research and testing There are multiple solutions to address the myriad of factors that influence the design and construction of animal research facilities There is no best design applicable for all facilities and arguably not even a single best design for a given facility For this reason Planning and Designing Research Animal Facilities is not intended to be a how to book The goal is to cover the basic programmatic requirements of animal research facilities provide ideas for meeting those requirements while hopefully stimulating the creative process in which designers in consultation with those who work in animal research facilities generate even better ideas That is how progress has been made and will continue to be made Facilitates communication between the parties involved in planning and designing animal facilities by providing contemporary information and stimulating creativity that will help lead to wise decisions and advance the knowledge base for planning design and constructing animal research facilities
