The Beast In The Nursery On Curiosity And Other Appetites:

The Beast in the Nursery Adam Phillips, 2010-12-15 If you are disturbed by the idea that to grow up is to learn to live with disillusionment if you are fascinated by the perplexity of child rearing or if you fear you were more creative as a child The Beast in the Nursery offers an illuminating and possibly life changing experience In four interrelated essays Adam Phillips arrives at startling new insights into issues that preoccupied Freud showing in the process that far from having lost its relevance psychoanalysis is still one of our most incisive tools for the exploration of the human psyche and its possibilities Phillips transforms the genre of the essay into an instrument for intellectual investigation of the most absorbing kind

The Beast in the Nursery Adam Phillips, 1998 Many concerns about child abuse racism pornography and sexual relationships revolve around the notion of humiliation without spelling out quite what that involves This work of psychological discourse on central questions and anxieties of childhood by a child psychiatrist examines the theme of humiliation together with its manifestations excitement rage and revenge The material ranges from case studies from the author's own professional experience to Henry James's theory of art and life and Wittgenstein on the usefulness of hints

Silence in Second Language Learning Colette A. Granger, 2004-02-16 Within the complex process of second language acquisition there lies a highly variable component referred to as the silent period during which some beginning second language learners may not willingly produce the target language Silence in Second Language Learning claims that the silent period might represent a psychical event a non linguistic as well as a linguistic moment in the continuous process of identity formation and re formation Colette Granger calls on psychoanalytic concepts of anxiety ambivalence conflict and loss and on language learning narratives to undertake a theoretical dialogue with the learner as a being engaged in the psychical work of making and re making an identity Viewed in its entirety this study takes the form of a kind of triangulation of three elements the linguistically described phenomenon of the silent period the psychoanalytically oriented problem of the making of the self and the real and remembered experiences of individuals who live in the silent space between languages

Ten Lessons in Theory Calvin Thomas, 2013-08-01 An introduction to literary theory unlike any other Ten Lessons in Theory engages its readers with three fundamental premises The first premise is that a genuinely productive understanding of theory depends upon a considerably more sustained encounter with the foundational writings of Hegel Marx Nietzsche and Freud than any reader is likely to get from the introductions to theory that are currently available The second premise involves what Fredric Jameson describes as the conviction that of all the writing called theoretical Lacan's is the richest Entertaining this conviction the book pays more and more careful attention to the richness of Lacan's writing than does any other introduction to literary theory The third and most distinctive premise of the book is that literary theory isn't simply theory about literature but that theory fundamentally is literature after all Ten Lessons in Theory argues and even demonstrates that theoretical

writing is nothing if not a specific genre of creative writing a particular way of engaging in the art of the sentence the art of making sentences that make trouble sentences that make or desire to make radical changes in the very fabric of social reality As its title indicates the book proceeds in the form of ten lessons each based on an axiomatic sentence selected from the canon of theoretical writing Each lesson works by creatively unpacking its featured sentence and exploring the sentence's conditions of possibility and most radical implications In the course of exploring the conditions and consequences of these troubling sentences the ten lessons work and play together to articulate the most basic assumptions and motivations supporting theoretical writing from its earliest stirrings to its most current turbulences Provided in each lesson is a working glossary specific critical keywords are boldfaced on their first appearance and defined either in the text or in a footnote But while each lesson constitutes a precise explication of the working terms and core tenets of theoretical writing each also attempts to exemplify theory as a practice of creativity Foucault in itself

Queer Victorian Families Duc Dau, Shale Preston, 2015-02-11 The Victorians elevated the home and heteronormative family life to an almost secular religion Yet alongside the middle class domestic ideal were other families many of which existed in the literature of the time *Queer Victorian Families: Curious Relations in Literature* is chiefly concerned with these atypical or queer families This collection serves as a corrective against limited definitions of family and is a timely addition to Victorian studies Interdisciplinary in nature the collection opens up new possibilities for uncovering submerged marginalized and alternative stories in Victorian literature Broad in scope subjects range from Count Fosco and his animal children in Wilkie Collins's *The Woman in White* to male kinship within and across Alfred Tennyson's *In Memoriam* and Herman Melville's *Moby Dick* and the nexus between disability and loving relationships in the fiction of Dinah Mulock Craik and Charlotte M Yonge *Queer Victorian Families* is a wide ranging and theoretically adventurous exposé of the curious relations in the literary family tree
