It provides a sweeping yet vivid narrative of the two decades of developments that led from the Prague Spring of 1968 to the collapse of communism in 1989. Highlights of that narrative include among other things discussions of Solidarity and civil society in Poland, Charter 77 and the Velvet Revolution in Czechoslovakia and the bizarre regime of Romania's Nicolae Ceaușescu and his violent downfall. In this second edition, now appropriately subtitled *Collapse and Rebirth in Eastern Europe*, Stokes not only has revised these portions of the book in the light of recent scholarship but has added three new chapters covering the post-communist period, including analyses of the unification of Germany and the collapse of the Soviet Union, narratives of the admission of many of the countries of the region to the European Union, and discussion of the unfortunate outcomes of the Wars of Yugoslav Succession in the Western Balkans.

**Challenged Borderlands** Vera Pavlakovich-Kochi, Barbara J. Morehouse, 2017-03-02 In the early 1990s borders within Europe and between the United States and Mexico began to open. The increasing flow of goods, capital, ideas, and people across boundaries promised to reduce physical and cognitive distances. Simultaneously, challenges to identity have arisen within and between the European nation-states, driven not only by internal cultural and political dynamics but also by processes of globalization. Concurrently, the US-Mexican border emerged in public consciousness as a location of new opportunities, largely due to public perception of the benefits of the North American Free Trade Agreement (NAFTA). This book explores some of the contradictory yet simultaneous processes affecting border regions. A team of leading scientists offers a wide range of perspectives on global, national, regional, and local processes and provides a useful matrix for understanding their complex, multilayered implications. Key concepts such as globalization, borders, and identities are illustrated through local and regional case studies. **The Outer Limits of European Union Law** Catherine Barnard, Okeoghene

Odudu, 2009-03-05 A commonly expressed view is that the citizens and the Member States are destined to be overcome by the European Union. There is a sense that the Union of today is not what was intended to be created or acceded to by the Member States or its citizens. *The Outer Limits of European Union Law* brings together a diverse group of legal scholars to consider aspects of EU substantive constitutional and procedural law in a manner highlighting the many senses in which the European Union is or can be limited, and so demonstrating that the fear of being overcome is largely a false fear. By exploring the mechanisms and devices used to limit the European Union, the contributors also reveal not only the strengths of the various limits but also, and more crucially, the weakness of the limits, thereby demonstrating that the prospect of being overcome may be a genuine risk to be guarded against. By considering general themes, e.g. legitimacy and core subject areas, e.g. policing, free movement of goods, remedies, the book reveals the various techniques used by the Court of Justice.

Community institutions and Member States to define and modify the outer limits of the European Union and European Union Law

**Explaining Post-communist Diversity** Mieczyslaw Pawel Boduszynski, 2004 *Geospatial Challenges in the 21st Century* Kostis Koutsopoulos, Rafael de Miguel González, Karl Donert, 2019-01-16 This book focuses on 21st century geospatial technologies. It highlights their broad range of capabilities and their essential role in effectively addressing and resolving critical everyday issues such as environment sustainability, climate change, urban planning, economy, culture, and geopolitics. Featuring chapters written by leading international scientists, it discusses the application of geospatial tools and demonstrates that the problems requiring such tools transcend national boundaries, cultures, political systems, and scientific backgrounds on a global scale. In addition, it enhances readers' spatial understanding and geographical reasoning in connection with societal issues. The book will appeal to scientists, teachers, and students of geography, the earth sciences, and related areas, as well as decision makers interested in the application and capabilities of geospatial technologies and new spatial methods for addressing important issues.

Globalization and Europe's Rural Regions Birte Nienaber, 2016-03-03 This book examines the multiple ways in which rural regions in Europe are being restructured through globalization and the regional development responses that they have adopted. It provides an understanding of the key challenges and opportunities for rural regions arising from the major economic, social, political, and cultural changes associated with globalization, including trade liberalization and economic deregulation, increased international migration, and the rise of global consciousness about environmental issues. Drawing on examples and findings from a major European research project, DERREG, the book presents detailed case studies of ten regions in different parts of Europe, exploring the factors that lead to different experiences of globalization in each of the regions and highlighting examples of good practice in regional development responses. The book concludes by proposing a typology of regional responses to globalization and considering the policy implications of the research findings. As such, *Globalization and Europe's Rural Regions* is important reading for geographers, sociologists, planners, and economists interested in understanding the impact of globalization in rural regions and for rural development professionals seeking to mobilize effective responses.

**Peace Psychology in the Balkans** Olivera Simić, Zala Volčič, Catherine R. Philpot, 2012-03-06 The volume covers the development of peace psychology in the Balkans. The Balkans is a region marked by post-communist and post-conflict transitional turmoil, and this book provides a comprehensive introduction to research in peace psychology in this part of the world, written by scholars primarily working in the Balkan area. It brings together innovative scholarship that examines interdisciplinary aspects of peace psychology, researched and written by scholars from Kosovo, Serbia, Bosnia, Bulgaria, Romania, Macedonia, Croatia, and Slovenia, as well as presenting research that responds to contemporary global issues by tracking the ways in which peace psychology is developing and implementing in the Balkans.
