Patterson,2017-06-13 Excerpt from Small Boat Building Even for the simplest boat drawings showing the dimensions and form of hull and the general arrangement are required Construction plans showing the arrangement and sizes of all parts are also desirable but not absolutely necessary for small boats However unless the amateur is familiar with such things he should obtain this information from the designer or a practical builder Plans may be obtained from a designer or taken from some magazine if published for that purpose About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works      *Practical Boat Building for Amateurs: Full Instructions for Designing and Building Punts, Skiffs, Canoes, Sailing Boats, Etc.* Adrian Neison,2016-09-06 This vintage book is a complete and accessible guide to boat construction with full instructions for designing and building punts skiffs canoes sailing boats and more With detailed working drawings and simple step by step instructions this volume is ideal for those with little previous experience and would make for a fantastic addition to collections of related literature Contents include Introductory Designing Tools and Materials Punts Clench Built Skiffs The Rob Roy Canoe The Sailing Boat Canadian Bateau Canvas Canoe American Shooting Punt etc Many vintage books such as this are becoming increasingly scarce and expensive It is with this in mind that we are republishing Practical Boat Building for Amateurs now in an affordable high quality edition complete with a specially commissioned new introduction on constructing boats      *Small Boat Building* Dave Gannaway,1978      *Small Boat Building* Harold Wallace Patterson,2013-09 This historic book may have numerous typos and missing text Purchasers can usually download a free scanned copy of the original book without typos from the publisher Not indexed Not illustrated 1916 edition Excerpt CHAPTER VIII PLANKING PERHAPS planking presents more difficulties to the amateur than any other part of the construction but there is no mystery about it and once the principle is grasped it should be a comparatively easy matter to cover a frame so that it is both strong and watertight The principal difficulty for the inexperienced is to proportion and run the strakes as the planks are called so that the material is used to good advantage and the seams show fair and sweet from all points of view A planking job may look well when viewed from the side but an end view which foreshortens the planks may show unfair curves reverse curves and other defects I strongly advise the amateur to examine critically the work of professionals when much information will be gained There are many different methods of planking but only four will be considered as they no doubt fully cover all amateur requirements These are 108 carvel ribband carvel clinker and double planking See Plate 8 Carvel or smooth planking is the most common form and may be used for all

types of boats providing the planking is not too thin to hold the caulking % is about the minimum The planks are fitted edge to edge and the seams caulked with cotton or oakum to make them watertight Ribband Carvel also called batten seam is just like carvel planking with the addition of a ribband or batten fitted over the seams on the inside to which the planks are riveted Thin planking may be used and a strong job obtained the same as with clinker planking but it has the advantage of being smooth on the outside and if well done requires no caulking Clinker or lap strake which is principally used for small boats has the edges of the planks lapped like the clapboards
