McLennan, 2014-09-28 This issue of Obstetrics and Gynecology Clinics of North America attempts to provide an overview of the more common causes of chronic pelvic pain in women It brings together experts in various fields of gynecology gastroenterology physical therapy and urogynecology in an attempt to discuss the wide variety of common clinical conditions that can manifest as pain The intent is to enable the physician to consider not only the common gynecologic causes but also the common nongynecologic causes based on certain symptom profiles and targeted clinical examination Should the physician not feel comfortable in treating the nongynecologic causes it would enable them to target their referral to a more appropriate physician rather than the patient being referred back to a general primary care physician It is our hope that it will enable the reader to see the pelvis not as an ovary or a uterus but as a whole system of interacting organs muscles and nerves In addition there is very little in the Obstetrics and Gynecology literature about the treatment of the pain component with opioid and nonopioid medications As one of my colleagues frequently states we can treat the pain but not necessarily alleviate the suffering The overview of complementary and alternative medications and opioid use will hopefully be useful to the practicing physician as it provides an evidence based approach to the use of these therapies specifically for chronic pelvic pain **Dr. Gyl's Guide to a Successful Hearing Care Practice** Gyl A.

Terrorism and Geopolitics Clay Schrader, 2017-02-01 Terrorism has become the greatest evil in our worlds today It is perpetrated by fanatics who are utterly indifferent to the sanctity of human life Although the international community remains divided a universal definition of what is meant by terrorism yet it remains committed to confront it through a variety of means Terrorism draws its motivation from a clear and organized intention Terrorists believe they are acting out a moral imperative on behalf of a well established organization Terrorists are not maniacs and terrorism is not an accident Terrorism is carefully planned yet invisible until it strikes This is one of terrorism s most powerful aspects Neither the time nor place is predictable And the moment public fear subsides terror may erupt again Geopolitics is defined as a branch of geography that promises to explain the relationships between geographical realities and international affairs The idea that such relationships exist was noted as early as the ancient Greeks Although noted at this early time it was only with the discovery of the conceptual and methodological tools of modern geography that scholars became convinced they could examine the connections in something approaching scientific precision Ideology acts as a veneer to cover real geopolitical interests and has been more than explicit in the American drive to camouflage its interests in Afghanistan and Central Asia under the cover of the War on Terror While the American policy has been to sponsor liberal democracy in Afghanistan and keep the war ravaged country weak without allowing the state to consolidate power it did not bother to strengthen the hands of the authoritarian rulers of Central Asia in the name of creating a common front against terrorism The present book is a document of that issues that is giving a new global philosophy of terrorism to the entire world and showing the path for the return to normal life
