## **Small Groups Political Behavior:**

**The Handbook of Political Behavior** Samuel Long, 2013-11-11 In the writing of prefaces for works of this sort most editors report being faced with similar challenges and have much in common in relating how these challenges are met They acknowledge that their paramount objective is to provide more than an overview of topics but rather to offer selective critical reviews that will serve to advance theory and research in the particular area reviewed The question of the appropriate audience to be addressed is usually answered by directing material to a potential audience of social scientists graduate students and occasionally advanced undergraduate students Editors who are confronted with the problem of structuring their material often explore various means by which their social science discipline might be subdivided then generally conclude that no particular classification strategy is superior In elaborating on the process by which the enterprise was initiated editors typically resort to a panel of luminaries who provide independent support for the idea and then offer both suggestions for topics and the authors who will write them Editors usually concede that chapter topics and content do not reflect their original conception but are a compromise between their wishes and the authors expertise and capabilities Editors report that inevitable delays occur authors drop out of projects and are replaced and new topics are introduced Finally editors frequently confess that the final product is incomplete with gaps occurring because of failed commitments by authors or because authors could not be secured to write certain chapters

**The Oxford Handbook of Political Leadership** R. A. W. Rhodes, Paul 't Hart, 2014-05-29 Political leadership has made a comeback It was studied intensively not only by political scientists but also by political sociologists and psychologists Sovietologists political anthropologists and by scholars in comparative and development studies from the 1940s to the 1970s Thereafter the field lost its way with the rise of structuralism neo institutionalism and rational choice approaches to the study of politics government and governance Recently however students of politics have returned to studying the role of individual leaders and the exercise of leadership to explain political outcomes The list of topics is nigh endless elections conflict management public policy government popularity development governance networks and regional integration In the media age leaders are presented and stage managed spun DDLas the solution to almost every social problem Through the mass media and the Internet citizens and professional observers follow the rise impact and fall of senior political officeholders at closer quarters than ever before This Handbook encapsulates the resurgence by asking where are we today It orders the multidisciplinary field by identifying the distinct and distinctive contributions of the disciplines It meets the urgent need to take stock It brings together scholars from around the world encouraging a comparative perspective to provide a comprehensive coverage of all the major disciplines methods and regions It showcases both the normative and empirical traditions in political leadership studies and juxtaposes behavioural institutional and interpretive approaches It covers formal office based as well as informal emergent political leadership and in both democratic and undemocratic polities **Oxford Handbook of Political Behavior** Russell J. Dalton, Hans-Dieter Klingemann, 2007 Assembles the world s leading scholars on public opinion and political behaviour to describe the state of the art research on the beliefs values and behaviours of contemporary politics **Masters of Political Science** Donatella Campus, Gianfranco Pasquino, 2009-09-01 For a while now

political science as a discipline has been big enough in terms of the number of academics and analytically mature enough to justify reflections on and reviews of its achievements. In fact there is no lack of general handbooks, dictionaries and state of the art assessments as well as reflective journals such as the ECPR's own European Political Science which are useful in helping us to understand and evaluate where we currently are and where we might still need to go. The focus of these texts however is on particular concepts, themes, research areas, institutions or behaviour. What they rarely do is indulge in a critical reflection on the political scientists themselves, especially those who are commonly accepted as having made the most significant contributions to the growth of their discipline. This book fills an important gap in the growing reflective literature on the political science discipline. It consists of a series of objective profiles of the Masters of Political Science written by political scientists who have read and studied their work and who are therefore in a position to evaluate the nature of their contributions. The Masters: Robert Dahl, Anthony Downs, David Easton, S. E. Finer, Samuel P. Huntington, Juan J. Linz, Seymour Martin Lipset, Giovanni Sartori, Sidney Verba, Aaron Wildavsky, Hans Morgenthau. Masters of Political Science was originally published in Italian by il Mulino Publishing House.

**Political Organizations** James Q. Wilson, 2021-02-09. A major work by one of America's eminent political scientists, Political Organizations has had a profound impact on how we view the influence of interest groups on policymaking. James Wilson wrote this book to counter two ideas that popular interests will automatically generate political organizations and that such organizations will faithfully mirror the opinions and interests of their members. Moreover, he demonstrated that the way in which political organizations, including parties, business groups, labor unions and civil rights associations, are created and maintained has a profound impact on the opinions they represent and the tactics they use. Now available for the first time in paperback, this book has broadened its scope to include recently developed organizations as it addresses many of today's concerns over the power of such groups as special interest lobbies. In 1973 when this book was first published, the press and public were fascinated by the social movements of the 1960s, thinking that the antiwar and civil rights movements might sweep aside old-fashioned interest group lobbies. Wilson argued, however, that such movements would inevitably be supplanted by new organizations, ones with goals and tactics that might direct the course of action away from some of the movements' founding principles. In light of the current popular distress with special interest groups and their supposed death grip on Congress, Wilson again attempts to modify a widely held view. He shows that although lobbies have multiplied in number and kind, they remain considerably constrained by the difficulty they have in maintaining themselves.

The Psychology of Political Behavior in a Time of Change Jan D. Sinnott, Joan S. Rabin, 2020-10-23. This volume seeks to add a unique perspective on the complex relationship between psychology and politics, focusing on three analytical points of view: 1. psychology, politics and complex thought; 2. bio-psycho-social factors of masculinity and power; and 3. underlying factors in political behavior. Contributors examine recent political events worldwide through a psychological lens, using interdisciplinary approaches to seek a deeper understanding of contemporary political ideas, psychologies and

behaviors Finally the book offers suggestions for surviving and thriving during rapid political change Among the topics discussed Biopsychological factors of political beliefs and behaviors Understanding political polarization through a cognitive lens Impact of psychological processes on voter decision making Motivations for believing in conspiracy theories Nonverbal cues in leadership Authoritarian responses to social change The Psychology of Political Behavior in a Time of Change is a timely and insightful volume for students and researchers in psychology political science gender studies business and marketing and sociology as well as those working in applied settings practitioners government workers NGOs corporate organizations
